The NIS2 Enterprise portal

The Cyber Basics NIS2 compliance management portal is an online package that unites the legal, organizational and technical requirements. It offers a clear structure for implementing the NIS2 directive for your organization.

The base of policies and procedures are ready to implement. All your additional information or documents can be added.

The portal is an Information Security Management System (ISMS) that smartly organizes the following:

- Insight of the required NIS2 measures
- The structured implementation of NIS2
- Continuous registration of your NIS2 measures
- Management insights in progress
- Direct demonstrability of compliance
- Changes and additions in the future
- Technical requirements based on CIS controls /Zero Trust Architecture
