

How Can Organizations Defend Themselves?

Protecting Businesses From Cyber Crime

Traditional Security Tools

Anti-Virus: Blocks known threats

Endpoint Detection & Response: Threat profile scores alerts

Phishing emails

Misconfigured or outdated security software

Unpatched apps

These attacks can circumvent basic security tools

Resulting in...

Unauthorized Access

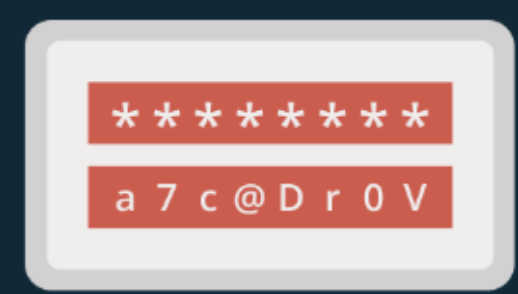

Malware
Ransomware

Data Theft
Espionage

Resources Hijacked
Crypto mining

Password
Stealing

Now What?

Do Nothing

 CYDEF

Traditional
Threat Hunting
Solutions

70%

of cyber attacks target SMBs

\$6T

Forecasted cost for cybersecurity damages in 2025

CYDEF's SMART-Monitor Threat Hunting Service:

Intercepts attacks that bypass traditional security tools

Patented technology identifies anomalous activity

Stops attacks before they can hurt your business

Service provider or in-house experts continuously monitor and maintain tech to refine alerts

Expensive and time-consuming

Results With CYDEF

Partnering with CYDEF extends your cyber capability (people, process and technology) to significantly reduce the risk of business interruption from a cyber attack.
