

Data Security as a Service

Secure, govern and protect your data.

Prevent data breaches, enforce compliance and safeguard sensitive information.

Powered by Microsoft Purview. Realised by CyberOne.

CyberOne's Data Security as a Service offers full visibility, control and protection for your data, optimising security and governance for Microsoft 365 Copilot readiness. Powered by Microsoft Purview, this managed service ensures governance, risk management and compliance across the data lifecycle with minimal management effort.

Part of CyberOne's Assure 365 suite, our fully outsourced Managed Microsoft Security solution offers modular cyber security services tailored to your needs. It delivers comprehensive, scalable protection to strengthen resilience and empower you to focus on your core business objectives.

What is Microsoft Purview?

Microsoft Purview is a comprehensive data security solution that empowers organisations to gain visibility and control over their data estate. It enables discovery, classification and protection of sensitive information across on-premises, multi-cloud and SaaS environments.

Seamlessly integrated with Microsoft's Security suite, Purview provides unified data management, supporting compliance, risk management and robust data protection.

CyberOne's Data Security as a Service, powered by Microsoft Purview, delivers end-to-end data governance, helping organisations secure sensitive data, streamline compliance and maximise readiness for Microsoft 365 Copilot with minimal overhead.

Key Features of CyberOne's Data Security as a Service

CyberOne's Managed Data Security Service provides visibility, control and protection for your data, minimising risks and ensuring compliance. Powered by Microsoft Purview, our service strengthens data governance, safeguards sensitive information, supports regulatory needs and prepares your organisation for AI and Microsoft 365 Copilot.

Data Discovery

Continuous discovery to identify and map at-rest data across on-prem and cloud.

Data Protection & Encryption

Prevent unauthorised access, ensuring privacy and security across your organisation.

Automated Data Classification

Setup and maintenance of policies to protect sensitive information

Data Loss Prevention (DLP)

Controls to prevent data exfiltration across email, web, removable media and cloud repositories.

Insider Threat Management

Auditing and alerting for unusual user data access, reducing risks of internal threats.

eDiscovery & Data Preservation

Efficient management of data for legal investigations, SARs and case management.

Data Lifecycle & Retention

Implementation of retention and archiving policies to ensure regulatory compliance.

Data Governance & Compliance

Regulatory adherence with regular audits and data alignment to policies.

Microsoft 365 Copilot Readiness

Creation of a secure, compliant environment for Microsoft 365 Copilot AI, with robust data governance, protection, and lifecycle management.

Unlock Business Value with CyberOne

24x7 Data Protection

Continuous monitoring and rapid response to secure sensitive data and prevent unauthorised access.

Scalable Data Governance

Enforces data policies across environments seamlessly, ensuring compliance and data security at scale.

Unified Data Visibility

Centralised insights across your data for enhanced detection, response and decision-making.

Controlled Data Access

Securely manage data access to minimise unauthorised use and protect sensitive information.

Insight-Driven Data Compliance

Real-time analytics and reporting to meet regulatory needs and proactively manage risks.

Optimised Data Operations

Automate data management, freeing up resources and simplifying compliance.

Seamless Experience

Secure sensitive data without disrupting workflows, enabling uninterrupted access to critical information.

Proactive Risk Management

Identifies and mitigates vulnerabilities early to prevent data exposure.

Copilot & AI Readiness

Modernise your business with a secure, compliant data environment optimised for AI and Microsoft 365 Copilot.

Cost-Effective Compliance

Maximise your investment in Microsoft by reducing tool costs and enhancing compliance.

Why Choose CyberOne's Data Security as a Service?

CyberOne's Managed Data Security Service delivers the expertise, resilience and efficiency needed to protect data, ensure compliance and unlock insights.

1. Microsoft Purview Expertise

CyberOne's certified specialists bring deep knowledge of Microsoft Purview, ensuring best-practice implementation and maximum data security.

2. Proven Data Protection Standards

Backed by ISO 27001 certification, CyberOne implements rigorous security protocols to consistently safeguard sensitive data across your ecosystem.

3. 24x7 Data Monitoring

CyberOne's CREST-accredited SOC offers around-the-clock monitoring and rapid response to protect against data breaches and misuse.

4. Simplified Compliance Management

CyberOne automates and manages compliance tasks, reducing the burden on your internal teams while maintaining regulatory alignment.

5. Maximised Microsoft ROI

Optimise your Microsoft investment with CyberOne's certified expertise across Purview, Microsoft 365 and the wider Security suite.

6. Insightful Reporting & Analytics

CyberOne's real-time insights empower your organisation with detailed reporting to inform strategy and meet audit requirements.

7. Future-Ready Data Environment

CyberOne prepares your organisation for modern technology with secure, compliant support for AI and Microsoft 365 Copilot.

8. Tailored Risk Mitigation

CyberOne proactively identifies and addresses data vulnerabilities specific to your business, reducing exposure before threats materialise.

About CyberOne

CyberOne are trusted by some of the world's most admired brands and organisations, dedicated to securing their mission-critical services.

Our 'Resilience Without Compromise,' ethos drives us, bringing together the brightest talent and the best technologies, our comprehensive end-to-end cyber security solutions offer complete protection, ensuring resilience against an ever-evolving threat landscape.

Headquartered in the UK, our experienced Global Security Operations Centre (SOC) ensures relentless round-the-clock surveillance, so clients can focus on what they do best.
