

Endpoint as a Service

Device & App Deployment, Configuration and Management. Strengthen Security and Enhance Compliance Across Your Organisation.

Powered by Microsoft Intune. Realised by CyberOne.

CyberOne's Managed Endpoint Service delivers comprehensive protection for devices and applications across your digital landscape. Built on Zero Trust principles and powered by Microsoft Intune, it provides a scalable approach to endpoint security, offering secure, resilient management with minimal overhead.

Part of CyberOne's Assure 365 suite, our fully outsourced Managed Microsoft Security solution offers modular cyber security services tailored to your needs. It delivers comprehensive, scalable protection to strengthen resilience and empower you to focus on your core business objectives.

What is Microsoft Intune?

Microsoft Intune is a leading endpoint management solution that protects devices, apps and data across diverse environments. Supporting both corporate and BYOD devices, Intune enforces essential security features like encryption, password protection and remote wipe, integrating with Microsoft Entra ID to align with Zero Trust principles.

Intune simplifies app management, enabling secure deployment, configuration and updates. Its Mobile Application Management (MAM) secures corporate data on personal devices through app-specific policies without full device enrollment.

CyberOne's Endpoint as a Service, powered by Intune, delivers a comprehensive solution for endpoint security, compliance and control. This enables organisations to support secure remote work, optimise device performance and maintain compliance with minimal overhead.

Key Features of CyberOne's Endpoint as a Service

CyberOne's comprehensive Managed Endpoint Service secures devices and applications, streamlines management and enforces security policies—reducing your organisation's risk and ensuring compliance across all endpoints.

Device & Mobile Management

Full lifecycle management for corporate and BYOD devices inc. enrollment and configuration.

19

Mobile Application Management (MAM) App deployment, configuration and policy control for corporate and personal devices.

Security Policy Enforcement Enforce device security policies and routinely

review for compliance.

Device Compliance Monitoring and enforcement of security standards to restrict non-compliant devices.

Conditional Access Integration

Apply and manage Zero Trust security policies to limit unauthorised device access.

Patch Management

Schedule automatic updates, test patches and monitor device update status.

Remote Wipe & Device Retirement

Remotely wipe compromised, lost or stolen devices.

End-of-Life Management

Safe retirement of devices including full decommissioning and wiping data securely.

Endpoint DLP

Restrict access to removal media such as USBs to mitigate data exfiltration.

Enhanced Visibility & Reporting

Insights into security, compliance and device health to identify risks and enhance protection.

Unlock Business Value with CyberOne

Enhanced Endpoint Security

24x7 protection with proactive threat detection, remote wipe and device compliance enforcement to reduce risks.

Scalable Compliance

Automate and maintain consistent policies across all devices, ensuring adherence to regulatory standards.

Simplified Device Control

Apply security controls to limit unauthorised access, enforcing policies for corporate and personal devices.

Secure Data Access

Enable controlled data access for remote users, ensuring secure collaboration without compromising security.

Actionable Insights

Gain insights into device health, compliance status and security posture to make informed, proactive decisions.

Operational Efficiency

Streamline device provisioning, updates and patching, reducing workloads through automated management.

Enhanced User Experience

Provide seamless, secure access to apps and resources, supporting remote and hybrid work without friction.

Reduced Risk

Align device security policies with organisational risk levels to prevent unauthoried access and data breaches.

Business Continuity

Ensure uninterrupted access to critical resources, supporting resilience and rapid recovery from disruptions.

Cost Savings

Minimise in-house security demands and reduce expenses associated with endpoint management and compliance.

Why Choose CyberOne's Endpoint as a Service?

Choosing CyberOne's Managed Endpoint Service gives your organisation the expertise, resilience and efficiency needed to secure devices, keep apps updated, protect data and ensure compliance with ease.

1. Expertise You Can Trust

CyberOne's certified Microsoft specialists optimise Intune for robust endpoint security, proactively addressing evolving threats and industry best practices.

2. Guaranteed Security Outcomes

An NCSC Assured Service Provider, CyberOne upholds high standards in security and compliance, ensuring sensitive data is safeguarded organisation-wide.

3. Proactive Threat Detection

With NCSC Cyber Incident Response Level 2 accreditation, CyberOne provides real-time 24x7 monitoring and rapid response to help your organiation adapt to emerging threats, ensuring endpoint resilience.

4. Streamlined Device Management

CyberOne simplifies device provisioning, updates and deprovisioning, enhancing productivity while reducing IT overhead.

5. Maximised Microsoft ROI

Fully leverage your Microsoft investment with CyberOne's certified expertise across Intune, Microsoft 365 and the wider Security suite.

6. Ongoing Monitoring & Reporting

Supported by our CREST-accredited SOC, CyberOne delivers comprehensive reporting for full visibility into device health, compliance, and security posture, empowering informed decision-making.

About CyberOne

CyberOne are trusted by some of the world's most admired brands and organisations, dedicated to securing their mission-critical services.

Our 'Resilience Without Compromise,' ethos drives us, bringing together the brightest talent and the best technologies, our comprehensive end-to-end cyber security solutions offer complete protection, ensuring resilience against an everevolving threat landscape.

Headquartered in the UK, our experienced Global Security Operations Centre (SOC) ensures relentless round-the-clock surveillance, so clients can focus on what they do best.
