CyberOne

Digital Forensics, Incident Response & Recovery

Don't Just Respond. Recover.

Incidents Commonly Resolved:

- Ransomware & Malware Attacks
- Data Breach
- Phishing & Social Engineering Attacks
- Business Email Compromise
- Intellectual Property Theft
- Employee Misconduct & Insider Threats
- Distributed Denial of Service Attacks
- Cloud Security Incidents

As a leading NCSC Cyber Incident Response Assured Service Provider, CyberOne believes effective recovery is as crucial as the initial response. When under attack, stemming the bleed is the number one business priority, but this quickly pivots from stopping the attack to initiating the recovery.

Our 'Defend at Speed' philosophy extends beyond rapid defence to encompass comprehensive recovery, ensuring business continuity and fulfilment of business needs.

In the current threat landscape, a robust incident response and recovery plan is essential for organisations in all sectors. CyberOne's commitment to rapid threat neutralisation, operational restoration and the strengthening of security posture underscores the pivotal role of recovery—it's not an afterthought, but a critical phase in the incident lifecycle.

Our comprehensive approach ensures recovery is seamlessly integrated into the incident response process, enabling organisations to not only bounce back but emerge stronger and more resilient.

Our Approach

Quick Identification
Our advanced threat intelligence systems provide early detection to stay ahead of threats.

Efficient Detection
Our systems swiftly identify breaches, preventing them from escalating into larger issues.

Authoritative Response
We offer a decisive response to contain and eradicate threats while preserving crucial evidence.

Strategic Protection
We guard essential assets with cutting-edge security protocols, keeping your operations secure.

Damage Limitation
Our experts act quickly to contain and reduce the impact of cyber security incidents.

Minimised Network Access
We ensure any unauthorised access is promptly detected and blocked to maintain network integrity.

Reduced Recovery Time
Our streamlined processes get your operations back up with minimal downtime.

Robust Recovery
We ensure operations are restored with minimal disruption, reinforcing your defences for future challenges.

Digital Forensics, Incident Response & Recovery: Ready When You Need Us

At CyberOne, Digital Forensics, Incident Response & Recovery (DIFR) is more than a procedure—it's a commitment to operational continuity and cyber resilience. Once a breach occurs, our structured approach kicks in: we ascertain the what, how and who of the breach, assessing the scope of impact and ensuring increased resilience.

CyberOne Objectives

Limit the Damage

Immediate actions to contain and minimise the impact.

Efficient Restoration

Reducing the time and effort required to bounce back from an incident.

Accelerate Recovery

Streamlining the restoration of services for a swift return to business as usual.

Restrict Attacker Access

Cutting short the attacker's reach to safeguard your network integrity.

Why Choose CyberOne DIFR Services?

Direct Access to Cyber Security Experts
Benefit from unlimited access to CyberOne's experienced team of experts.

Immediate Analyst Response
Upon breach report, we dive into action to contain the threat.

Covert Surveillance Services
Discreetly monitoring to pre-emptively detect and address cyber threats.

Malware Reverse Engineering
Analysis to determine the depth of compromise and prevent repeat occurrences.

Regular Progress Updates
Stay informed as the investigation unfolds, with comprehensive communication throughout.

ISO27001 Compliant Services
Our operations conform to the highest international security management standards

NCSC Incident Response (Level 2) Assured Service Provider
Recognised at handling substantial cyber incidents.

Around-the-Clock UK-Based SOC Analysts
Ready 24x7 to respond as soon as a breach is detected.

Insider Threat Investigations
In-depth probing to resolve and mitigate internal security breaches.

Incident Classification and Impact Assessment
Swift determination of attack type and scope for targeted response.

In-Depth Reporting
Post-incident analysis outlining security gaps, consolidating learning and reinforcing security.

Bespoke Plan Design (Optional)
Craft and implement a plan that aligns with your unique needs.

About CyberOne

CyberOne are trusted by some of the world's most admired brands and organisations, dedicated to securing their mission-critical services.

Our 'Resilience Without Compromise,' ethos drives us, bringing together the brightest talent and the best technologies, our comprehensive end-to-end cyber security solutions offer complete protection, ensuring resilience against an ever-evolving threat landscape.

Headquartered in the UK, our experienced Global Security Operations Centre (SOC) ensures relentless round-the-clock surveillance, so clients can focus on what they do best.
