

DIGITAL RESILIENCE BOARDROOM READY

CRI Cyber Risk International is a boardroom-focused advisory firm, equipping leadership teams with the insight and support needed to achieve digital operational resilience. Through our flagship platform CyberPrism, we deliver regulator-grade assessments, continuous advisory, and strategic alignment with frameworks such as EU DORA, NIS2, the UK Operational Resilience Framework, and NIST CSF 2.0. Our managed service includes access to a Virtual Digital Operational Resilience Officer (vDORO), bridging the gap between compliance, governance, and confidence.

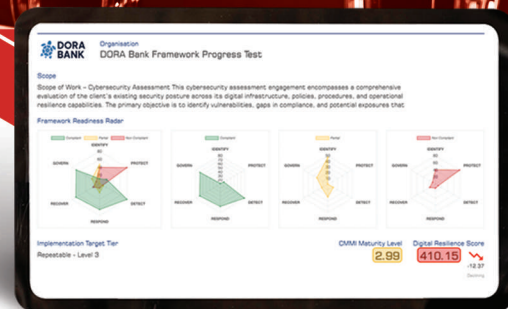

WHO WE ARE

Founded in 2014 by globally recognised cybersecurity leader Paul C Dwyer, CRI Cyber Risk International blends strategic advisory, executive education, and advanced technology to support organisations in regulated and high-risk sectors.

WHAT WE OFFER

Our Digital Resilience Programme helps organisations measure, manage, and continuously improve their cyber resilience posture. Powered by our CyberPrism platform and supported by expert advisors, the programme delivers:

- ✓ Regulator-grade assessments and reporting
- ✓ Strategic alignment with regulatory frameworks
- ✓ Embedded vDORO (Virtual Digital Operational Resilience Officer) support
- ✓ Customised maturity roadmaps and executive dashboards
- ✓ Integration of executive education into our delivery model — clients benefit from strategic enablement through industry-recognised qualifications, hands-on materials, and leadership forums.
- ✓ Access to exclusive educational content including certified training programmes, peer forums, and qualifications via the EU Cyber Academy.

HOW WE WORK WITH CLIENTS

How We Work With Clients

Initial Discovery & Baseline Assessment

We contextualise your risk posture and identify regulatory and operational exposures.

Platform Deployment & Enablement

We configure and onboard CyberPrism, enabling full visibility and role-specific access.

Ongoing Strategic Advisory (vDORO Model)

Your dedicated advisor drives governance, compliance alignment, and incident readiness.

Maturity Reporting & Board Briefings

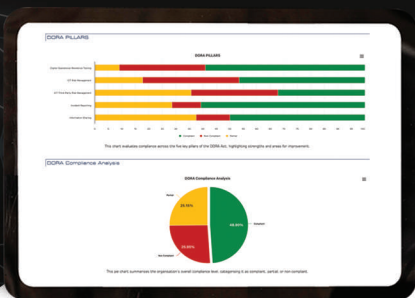

We provide scheduled, digestible reporting for leadership and regulators.

Embedded Executive Education

Our engagement doesn't stop at reports and advisory — we empower clients with ongoing access to the EU Cyber Academy's portfolio of certified training programmes, educational resources, and curated peer forums. This ensures that your leadership and operational teams are continuously upskilled to meet evolving resilience, compliance, and governance expectations.

We provide scheduled, digestible reporting for leadership and regulators.

USE CASES – WHO WE WORK WITH

We support a diverse, global client base across regulated sectors.
