

Agent 365 Pilot Deployment

Explore secure agentic workflows before you scale

Eligible for MCI Funding

Why Choose a Pilot?

This Pilot provides evidence-based clarity on how Agent 365 supports secure agentic AI at scale, enabling you to validate security and governance capabilities in your own tenant, demonstrate value to security and business stakeholders, and inform smarter investment decisions for Microsoft 365 E7 and agent adoption.

Agent 365 Pilot Benefits

Safely explore agentic AI for the business: Experience how Agent 365 enables agentic AI with enterprise-grade security, without committing to full production deployment.

Secure Agents: See how Agent 365 detects and mitigates risk, identifying broad or excessive permissions, risky agent behaviors and configurations, and potential threat vectors impacting agents.

Monitor Agent Activity: Understand how agents actually behave in practice, by seeing how Agent 365 provides visibility into agent actions and behaviors, prompt and response flows, and data security and appropriate-use policy enforcement.

Govern agents: Surface governance gaps that often go unnoticed until scaling, like agents without clear ownership, overlapping or redundant agents, and opportunities to improve governance.

How We Help

FAST TIME TO INSIGHTS

We focus on providing you a rapid, focused Pilot of agentic security that surfaces meaningful security and governance insights quickly so your agent strategy can move forward with confidence.

OPERATIONAL GUIDANCE

Your team doesn't just see the tools, they learn how to interpret findings, prioritize risks, and operationalize Agent 365 so they can hit the ground running with a full deployment.

EXTENSIBILITY

We show how Agent 365 can secure more than just Copilot. Outside agents like ChatGPT, Claude, Google, and more can be governed and secured for a full view of your agents.

ENHANCE E7 INVESTMENTS

Insights from the Pilot help justify and shape future full deployment.
