

Hybrid Datacenter Security PoC

Create a security posture that incorporates all of your assets

On-prem, Azure or other clouds- viewed by a single pane of glass in Sentinel

Offer highlights

Discover threats and vulnerabilities in your hybrid environment

Understand what can be done to reduce the attack surface area for hybrid workloads.

See Azure Defender and Azure Network Security. In action and extend protection to non - Azure hosted resources.

Develop new insights and mitigation strategies to improve your security stance.

Hybrid Datacenter Security PoC

Cyclotron Hybrid Datacenter Security PoC engagement team will review your IT footprint and create a hybrid cloud security strategy that will allow you to collect, aggregate your security data, regardless of where your assets reside. Your infrastructure assets will flow log information into Microsoft Sentinel so that you can have a unified view of your entire environment. You can then take advantage of a growing body of community contributions as well as portfolio of AI enabled Microsoft security services to tackle your specific needs .

Improve your security posture with a Hybrid Cloud Security PoC

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi -cloud security objectives —and identify current and real threats —by engaging Cyclotron in this effort.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on -premises and multi -cloud environments, plus clarity and support on how to improve your security posture for the long term.

Comprehensive approach for cloud deployment

Cyclotron's security focused approach will help you build extensible architecture that will meet your existing technical needs but will also scale well into the future. Our design will give you best practices architecture that can easily integrate with 3rd party solutions, while maintaining your security posture and minimizing your costs

Optimize Your Cloud Security

Identify current, security threats and vulnerabilities in your hybrid and multi-cloud environment

Cloud governance

Create a management group architecture and policies to ensure your organization the leverages cloud as you intended.

Minimize costs

Minimize surprises in your monthly costs by optimizing access to the cloud with guard rails.

Simplify Security

Take advantage of the O365 cloud generated data to create a full picture of your environment.
