

# Microsoft Purview Deployment

Discover, classify,  
and govern your  
data.

Cyclotron helps you unlock the power of business intelligence with Microsoft Purview - your ultimate data management solution.

WHAT YOU CAN DO

Empower users  
to protect their  
data

Detect  
unusual or  
risky actions

Enable automatic  
protection by  
admins

Prevent  
malicious  
activities

Govern  
communication  
channels

## For End Users

Protect data with user-defined file classifications and policy warnings

## For Administrators

Get reporting, enforcement, and investigation capabilities to manage and protect data across corporate environments.

## Why Cyclotron for Microsoft Purview Deployment?

Cyclotron provides a complete deployment approach to identifying, classifying, protecting, and monitoring sensitive data in a corporate environment, resulting in real-time views into where your highest-value data lives and flows within and outside your environment. Cyclotron's data protection approach is agnostic to the on-premises environment, covering both Microsoft 365 and cloud infrastructure workloads.
