

skypetoteams.io

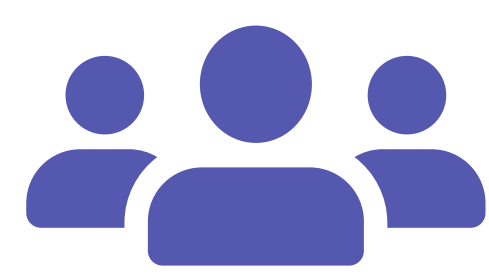

The automated Skype for Business to Microsoft Teams migration tool

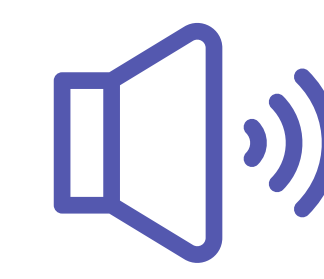

Why Upgrade

Single workspace,
tailored for you

A complete meeting
experience

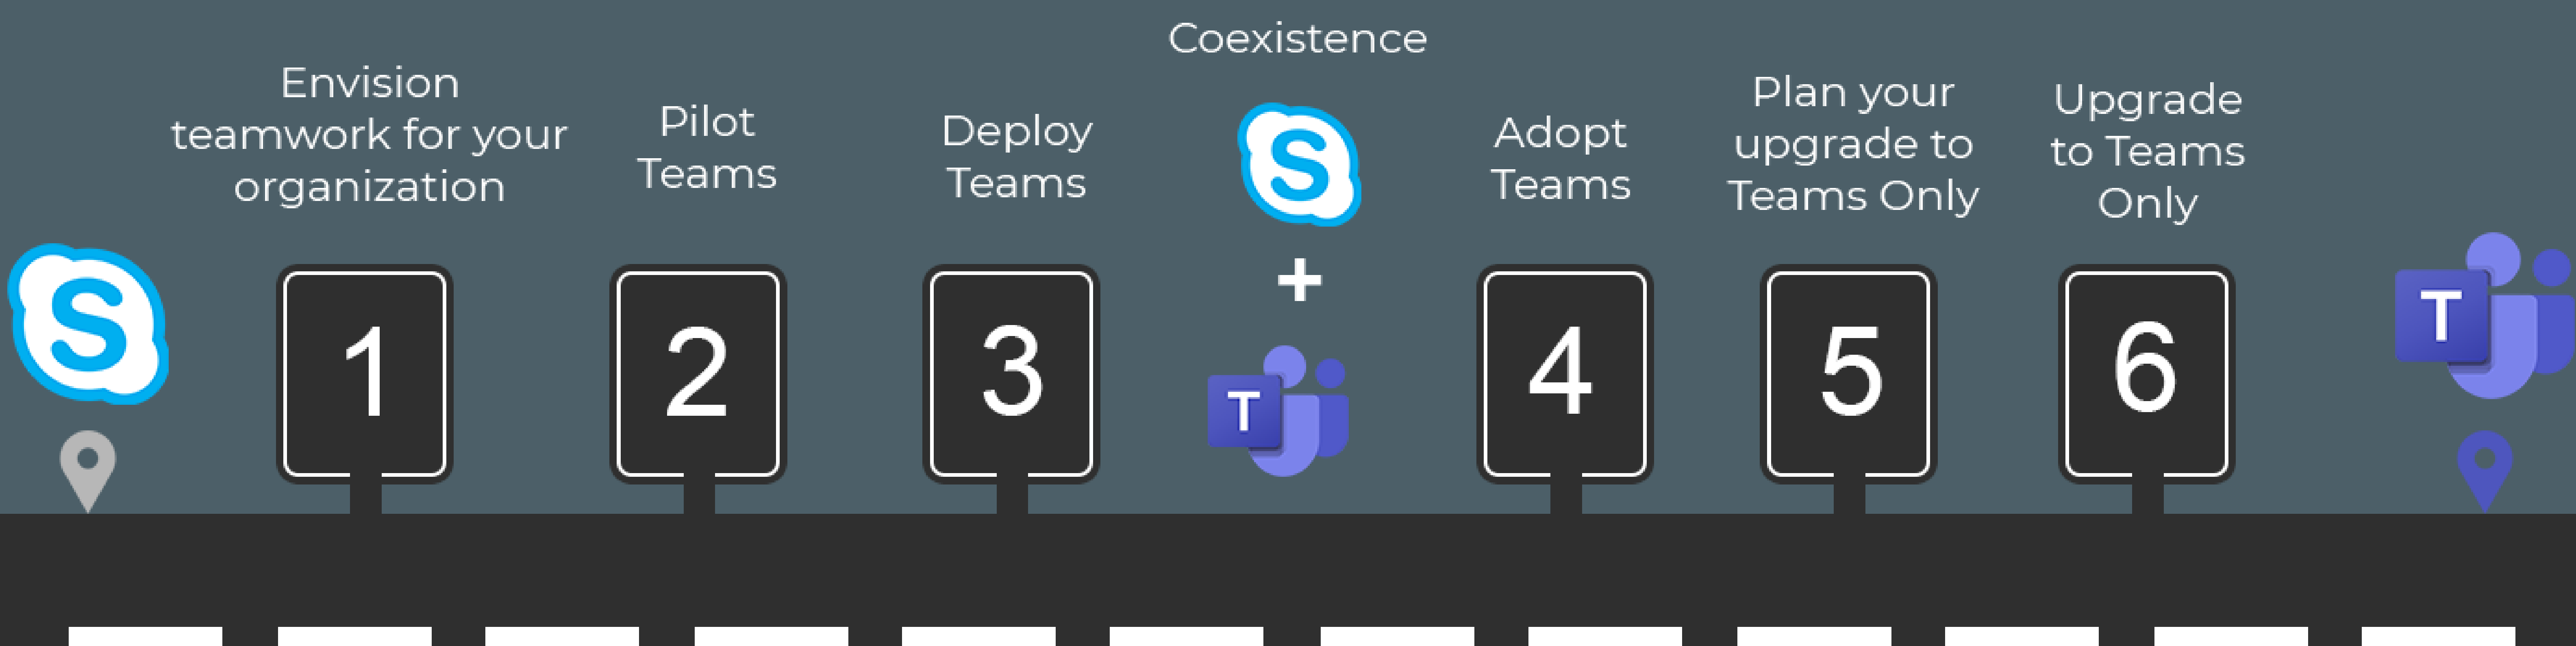

Enterprise-grade
voice and video

Cross-device
Support

Upgrade Roadmap

Features

- Templated inputs
- Support for both MFA and the Non-MFA authentication methods.
- Validates the users for enterprise voice and hosted voice mail policy.
- Provides Online voice routing policy, Tenant dial-plan and Teams emergency routing policy, and Teams calling policy (specifically essential for Location-Based Routing).
- Live migration status for each user during the process.
- Comprehensive post-migration report.
- Seamless bulk user migration using Powershell with auto-reconnects and release at end of migration.
- Activity tracking of migration during re-runs.
