Review of Teams network best practices and network assessment

Teams Phone Enablement

Cost: \$35K Duration: 7 weeks

A Teams Phone Enablement engagement will provide exploration of Teams Phone features and development of a plan to activate Teams Phone for a group of users. An engagement will include workshops to review and discuss:

1. Teams Phone capabilities and features
2. Governance of Teams
3. PSTN connectivity - Direct Routing/Operator Connect/Calling Plans
4. Telephony system integration
5. Teams network assessment
6. Phone number porting
7. Service provisioning and management
8. Adoption tools and approach

Completion of the workshops will result in a collaboratively developed plan to activate Teams Phone for a cohort of users. The plan will include details such as:

- Migration approach
- Steps to enable users for Teams Phone
- Common Area Phone configurations
- Auto attendants & Call Queues requirements
- Adoption and training activities

The collaboratively developed plan will be implemented, activating Teams Phone services in your environment.

Comprehensive approach to Teams Phone Enablement

Cyclotron's approach to enabling Teams calling and meetings will provide you with expert planning, implementation, and advisory services. Our team will work with you to explore the communication capabilities and features available in Teams meetings and Teams Phone.
