Passwords in email?

Never again.

Cylockr gives you the freedom to securely share sensitive information, minimising the risk of interception or archival in clear text.

The Problem

1 **Insecure sharing**

Credentials sent via email, chat, or text

2 **Data exposure**

Sensitive information vulnerable in transit

3 **Compliance risks**

Australian businesses face strict data protection laws

Our Solution

1	2	3	4

Generate

Create single-use, secure links

Send

Share link with recipient via your chosen method

Retrieve
