“INSPIRED BY
NATURE’S
PRECISION,
POWERED BY AI
TO TRANSFORM
CLINICAL
TRIALS”

Artem Andrianov, PhD
CEO & Founder

Founded in 2013 by experts from **ERT**, **Bayer**, and **Carefusion**, Cyntegrity empowers clinical trials with **AI-augmented Risk-Based Quality Management (RBQM)** solutions, grounded in **Quality by Design (QbD)** principles.

Meet Our Leadership Team

We are passionate about what we do

What We Do

With our presence in Europe and the USA, we partner with industry leaders globally to

- Optimize clinical trials with actionable insights
- Ensure compliance for regulatory inspections
- Streamline decision-making in M&A due diligence

Our proprietary My**RBQM**® Portal aligns with evolving **ICH E6 and E8** guidelines, addressing BioPharma's critical challenges:

- » **Patient Safety**
- » **Data Security & Reliability**
- » **Operational Inefficiencies**
- » **Misconduct**
- » **Compliance**

Fast Facts

Values:

- Quality
- Standards
- Compliance
- Transparency
- Interoperability

+50

Team of Experts

The best minds
creating your
Quality by Design strategy.

+140

Pharma & CRO Companies

Put their trust in Cyntegrity
to streamline their clinical trials
and ensure compliance.

+620

Global Clinical Studies

MyRBQM® expertise has
already been applied in over
620 clinical studies.

Discover Our Solution

MyRBQM®

MyRBQM® Portal

The MyRBQM Portal is an AI-augmented cloud platform that facilitates GCP-compliant, end-to-end risk-based quality management.

- » Integration Capabilities
- » AI-Augmented Efficiency
- » End-to-End Traceability

MyRBQM® Academy

Expert-led training and courses to foster a QbD culture, empowering teams for effective risk-based trial management and compliance.

- » RBQM Belt Certification
- » Instructor-led & e-Courses
- » Webinars & Workshops

MyRBQM® FSP

Our Functional Services Support processes and activities to ensure the successful rollout of a cross-functional RBQM system.

- » Protocol Risk Assessment & Mitigation
- » RBQM SOPs & GAP Analysis
- » Centralized Monitoring

Use Cases

MyRBQM®

Quality by Design

Protocol Complexity Evaluation
ICH-Compliant Workflows by Design

GCP Audits

Critical Audit Areas Identification
Issue Detection
Compliance Risks Prediction

Risk-Based Quality Management

AI-Augmented Risk-Assessment
Human-Supervised CSM
End-to-End Traceability

Regulatory Site Inspections

Remote & Virtual Inspections
Data Quality Across Study Sites
Resource Optimization

Clinical Operations

Centralized Monitoring
Adaptive Monitoring
Medical Monitoring

M&A Due Diligence

Quality of Clinical Data Report
Risk Assessment
Misconduct Detection

Targeted Data Access

Grant tailored permissions based on roles and responsibilities, not guesswork

Dynamic Adjustments

Quickly update access as studies evolve—no IT bottlenecks

Regulatory Confidence

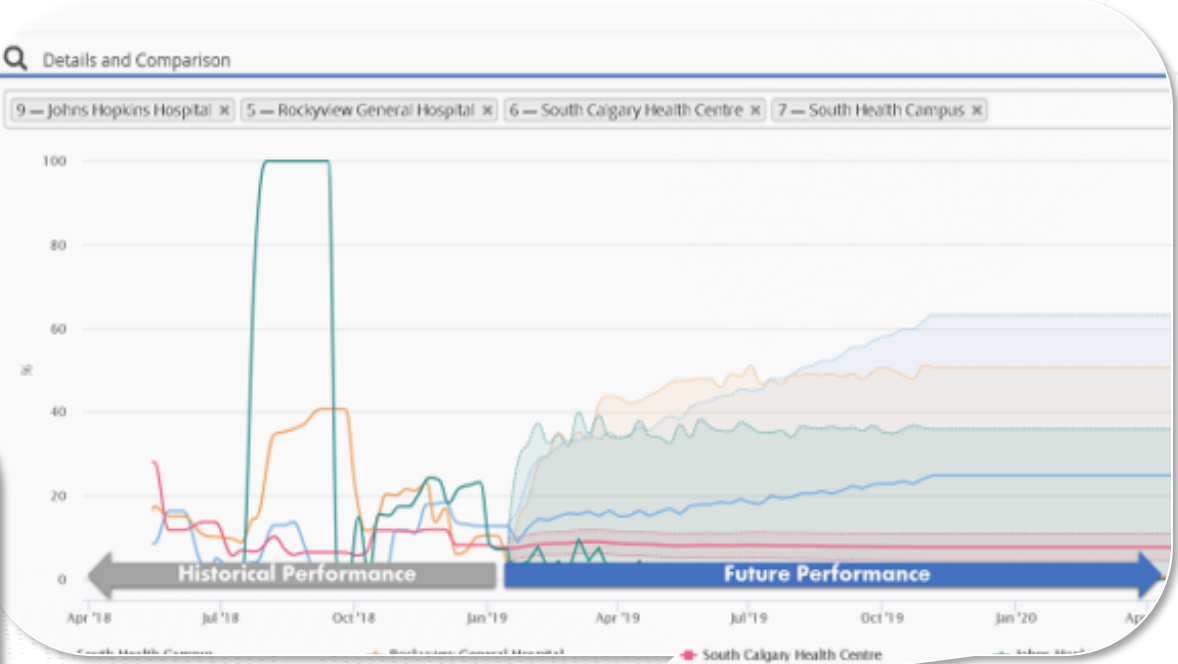

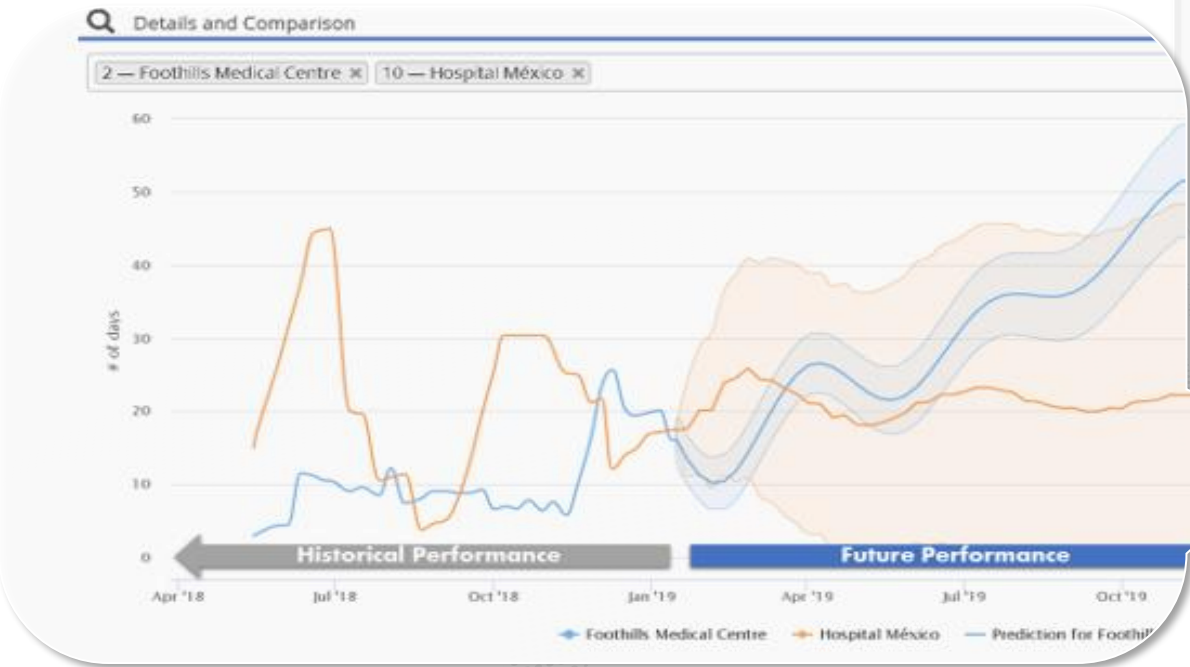

Meet strict privacy standards with secure, auditable access controls

Streamlined Operations

Reduce overhead and accelerate decision-making through clear, role-based transparency

Cross-Study Analytics

Visualization

Filter by 30% Completeness

	Study 1	Study 2	Study 3	Study 4	Study 5	KRI_1 (avg)
Site 1	2	1	1	2	1	1
Site 2	1	2	1	3	2	3
Site 3	2	2	2	3	3	3
Site 4	1	1	2	1	2	1
Site 5	3	1	2	3	2	3
Site 6	1	1	1	3	1	1
Site 7	2	3	1	3	1	3

Overview

The feature helps users **identify common behavioral patterns across sites** in selected studies and phases (e.g., 30%, 50% completes¹). It also provides key issue management statistics, including:

- Issue statistics for each KRI
- Average issue resolution time
- ICA and PA execution statistics

This enables users to identify problematic KRIs what issues require more resources (time).

Future plans: include AI-powered ICA effectiveness analysis and issue management summaries for specific KRIs.

Requirements

- » The feature requires **synchronization of KRI calculations across studies**.
Can be addressed using the recently introduced "Hide KRI" feature in MyRBQM. This allows creating a common study type (via Azure function) that spans a study program or all BU studies, enabling KRIs to be toggled on/off without worrying about calculation comparability.
- » Additionally, **site and region synchronization** is essential to ensure consistent analysis for the same sites across different studies.

Outcomes

- » Enables insights into patterns, such as **identifying common escalations in specific KRIs** (e.g., multiple sites experiencing escalations when study completeness reaches 30%).
- » Highlights **trends in issue management**, such as identifying a KRIs that, on average, require X days to resolve escalations.
- » Lays the **groundwork for** refining future study protocols or **modifying study designs** to mitigate highly probable issues.

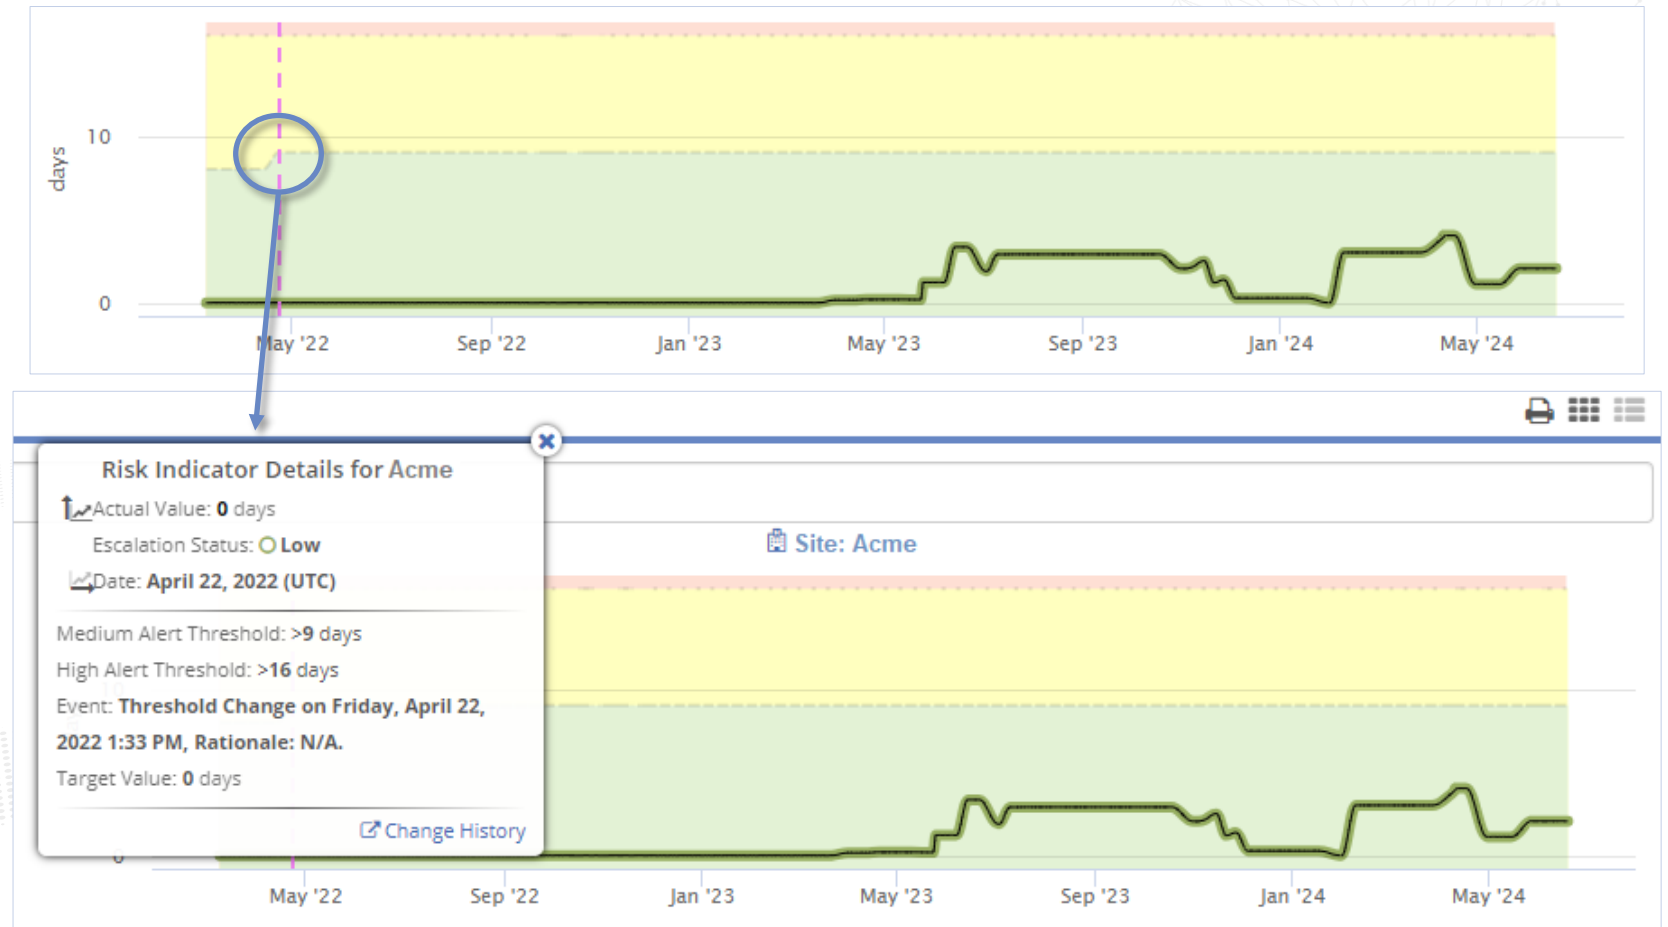

Rewind Time, Retain Context

Quality by Design in Action

MyRBQM Portal Facilitates Longitudinal Data Quality Audits

- » **Vertical Lines:** Indicate changes in the Risk Indicator (RI) thresholds, reflecting updates based on revised risk assessments.
- » **Tooltip:** Provides detailed information about each RI threshold change, ensuring you understand the context and rationale.

All information is preserved in its historical context: nothing is lost.

The Big Five

Cyntegrity's MyRBQM® Portal:

- » Tracks study progress with multi-timestamped datasets, providing a clear historical view of data changes.
- » Ensures data authenticity and traceability with three timestamps per data point.
- » Offers full audit trails by documenting all data transformations for reproducibility and compliance.
- » Supports real-time teamwork with simultaneous updates and shared access to study data.
- » Delivers consistent performance under heavy data loads with robust processing and optimized queries.
