

ABE: A BOT EXTENDER FOR MICROSOFT TEAMS

Your friendly AI assistant for reminders,
time zones & focused Copilot help, right
inside Teams

WHAT IS ABE?

Abe (A Bot Extender) is an intelligent AI chatbot and Copilot agent for Microsoft Teams that helps users stay organized by handling message-based reminders, instant time zone conversion, and time-focused Copilot queries directly inside Teams conversations.

Abe extends the Teams experience by acting as a helpful assistant you can add to chats, quietly supporting your day-to-day collaboration without extra tools or dashboards.

WHAT ABE HELPS YOU DO

NEVER FORGET IMPORTANT MESSAGES

Set reminders on specific Teams messages and return to them exactly when needed whether it's a follow-up, decision, or sensitive note.

INSTANT TIME ZONE CONVERSION

Mention a time in a Teams chat and Abe automatically converts it for everyone in the conversation, based on each person's local time.

FOCUSED COPILOT AGENT

Use Abe as a Copilot agent for time-related questions and reminders, delivering faster, more precise answers than general-purpose AI assistants.

WHAT ABE HELPS YOU DO

Create reminders in two easy ways:

Mention Abe in a chat

Example:

@Abe remind me
Thursday at 3:00 PM

Use Microsoft Teams message actions

Hover over a message
→ More actions (...) →
Remind me about this

What happens next:

- Abe sends a notification in the Teams Activity area
- Click the notification
- Teams opens the exact message you were reminded about

No searching. No scrolling.
Just the right message at the right time.

BUILT FOR REAL WORKFLOWS

Abe supports:

- Message follow-ups
- Global scheduling
- Returning to sensitive or temporary messages
- Private reminders that don't clutter chats
- Personal reminders via self-chat or Abe's chat

💡 **Example:** If you share sensitive information today, Abe can remind you next week so you can review the message and delete it manually when you're ready.

WHY TEAMS CHOOSE ABE

- Works natively inside Microsoft Teams
- AI-powered chatbot + Copilot agent
- Converts time zones instantly for all participants
- Sends reminders through the Teams Activity feed
- Helps users return to messages at the right time
- Secure, fast, Teams-native
- Built for Microsoft 365 environments

GET STARTED

Add Abe to Microsoft Teams and make reminders, messages, and time zones effortless, right inside the conversations you already use.
