

Calian[®] Corolar[™] Cloud: A Simple, Seamless and Secure Integration Solution

Future-proof interoperability and accelerate clinical outcomes with an end-to-end, cloud-native integration solution built for speed, scale and security.

Modernizing Care from End-to-End, Powered by Canadian Innovation

Corolar empowers Canadian healthcare organizations to seamlessly share data and deliver connected, high-quality care. With hands-on support through your entire transformation journey, we deliver a resilient, Canadian-built solution that puts patients and providers first.

Your Transformation Journey with Calian

Empowering Healthcare IT Teams

Simplify integrations

Connect any system with prebuilt adapters, schema libraries, and an intuitive interface—no deep IT expertise required.

Upskill IT teams

Strengthen internal capability with cloud training and hands-on support from our integration experts.

Secure data and stay compliant

Protect patient data and meet privacy standards with enterprise-grade security powered by Microsoft Azure.

Scale with demand

Meet growing healthcare needs with a cloud-native iPaaS that enables cost-efficient adoption of new interfaces without IT bottlenecks.

Focus on care, not code

Accelerate clinical outcomes by reducing deployment time—going live in as little as two days.

Why Healthcare Leaders Choose Corolar Cloud

Build a future-ready team

Enable your IT staff to manage and scale systems with a cloud-native, turnkey solution designed to adapt to change.

Scale with confidence

Respond to regulatory changes and new care models—without downtime or infrastructure strain.

Accelerate innovation

Integrate AI and modern applications to boost agility and innovation while strengthening existing systems.

Maximize cloud ROI

Modernize with deep support across the full integration lifecycle and reduced TCO to deliver measurable, lasting impact.

Key Features

1

Built on Microsoft Azure

Modernize faster through secure, seamless integration with a leading cloud ecosystem.

2

Cloud-native architecture

Ensure high availability and scalability while reducing costs and downtime.

3

Smart integration

Transform and move healthcare data across any format or protocol—legacy or modern.

4

Scalable and flexible

Pay as you grow with on-demand computing that adapts to your needs.

5

Enterprise-grade security

Protect patient data with HIPAA- and SOC 2-certified cloud security within a trusted cloud environment.

6

User-friendly interface

Quickly build, deploy and monitor integrations with custom alerts and pre-built dashboards.

Safe Beds Connected Care with CMHA Halton

—Creating a Connected Circle of Care

"The Safe Beds digital pathway provides a comprehensive view that compares a client's journey from beginning to end rather than individual chapters...Connecting that journey with Corolar Cloud expands our view of the client outcomes and the true cost of care in our system."

— Rashaad Vahed, CEO

William Osler Health System —Connecting 20,000+ Patients with MyChart

As one of Ontario's largest community hospital networks, William Osler Health System leveraged Corolar to power the MyChart patient portal—providing patients with real-time access to lab, diagnostic and clinical reports for more informed, connected care.

"Technology is now a significant part of the patient experience at Osler. It's not only a matter of patient rights and satisfaction, it's also a way of improving medical outcome."

— Mary Jane McNally, Chief Patient Experience Officer

Ready to modernize your integrations with Corolar Cloud?

Connect with our experts for a personalized integration assessment and discover how your organization can elevate patient care through digital transformation.
