Data Strategy and Governance Assessment

Data-Driven will deliver an Azure data and analytics assessment, along with a future data state roadmap to modernize your digital processes. This will help you leverage your data assets to improve business value and performance.

See what customers are saying:

"TfNSW needed a solution to capture real-time data for every vehicle in motion across the state. This solution just gives us that so that we mine nuggets from this data."

Sandeep Mathur, TfNSW Program Manager

Our Offer?

Current State Analysis Assessment

✓ Consider all data used (ingested, transformed and reported)

✓ Current data architecture and data flows

Data Strategy and Governance Roadmap

✓ Identification of any gaps in the data available for current and near-future analysis requirements.

✓ Consideration of data management and analysis processes required reporting and analytics.

✓ Consideration of the business direction and priorities.

Why our Data Strategy and Governance Assessment?

Data-Driven Culture
