

Microsoft Fabric Proof of Content

Validate the Future of Data Analytics

Curious about the capabilities of Microsoft Fabric? Our **Proof of Concept (PoC)** service is designed to help organizations explore and validate how Microsoft Fabric can address their unique data and analytics challenges. Through a hands-on approach, we create a customized environment to showcase Fabric's features, helping you assess its potential to transform your data strategy.

Simplicity of purchasing

No need to purchase separate compute for each workload

Flexibility in use

With no pre-allocation required, the same set of CUs can be used for any workload

Cost savings

All CUs are pooled together and are not locked to an idle workload. [Smoothing](#) on compute usage also allows you to size capacity closer to the average usage than the peaks

Value optimization

Adjust compute capacity by scaling up and down

Transparent monitoring

Centralized dashboard to monitor usage and costs in Microsoft Fabric utilization and metrics app

What we offer:

- **Initial Assessment:** Understand your business goals and identify key use cases for Microsoft Fabric.
- **Customized PoC Setup:** Deploy a test environment tailored to your data and workflows.
- **Data Integration Demonstration:** Showcase seamless data ingestion and transformation within Microsoft Fabric.
- **Real-World Scenarios:** Simulate your organization's workflows to evaluate Fabric's performance and capabilities.
- **Detailed Reporting:** Deliver actionable insights and recommendations for the next steps.
- **Expert Support:** Provide ongoing guidance throughout the PoC process to ensure success.

Why Choose Data-Driven?

At Data-Driven, we bring years of expertise in Microsoft technologies, data, and AI. Our tailored solutions and customer-centric approach ensure that every organization, regardless of size, can achieve measurable outcomes with Copilot.

* **Certified Microsoft Experts** * **Proven Track Record in AI and Data Solutions**
