Your Data Governance Challenges

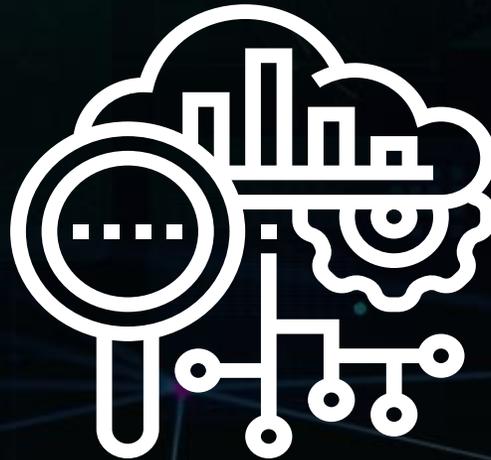

Meeting compliance obligations

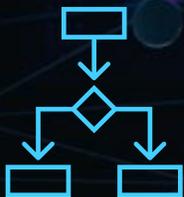

Understanding value & ROI

Impact to my people

What solutions are available?

Impact to business processes

Knowing where to start

Azure Purview Pilot approach

Goal

- Accelerated deployment of Azure Purview in your environment
- Serve as a governance tool for your team to configure additional data sources, classifications and glossary terms
- On-boarding of first set of business users
- Understand costs for implementation and potential ROI

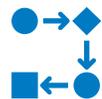

Outcomes

- Azure Purview provisioned with a baseline configuration in a single environment
- Connection of up to ten (10) data sources and setup of initial scan schedules
- Connection of Power BI and Azure Data Factory (if deployed)
- Content tagging and custom classification rules
- Walkthrough of Azure Purview and demonstration of usage
- Recommendations, lessons learned and next steps summary

Requirements

- Azure tenancy (production environment recommended)
- Cloud data sources supported by Azure Purview
- Access to create resources, resource groups, managed identities
- Access to the cloud data sources (network and permissions)
- Attendance of workshops by technical and business stakeholders

Methods

Our pilot approach is designed to provide an accelerator to get started with Azure Purview as quickly as possible. You will be able to harness the full features of Purview and provide access to your business users, in context of your own environment. The pilot is completed over 2-4 weeks, which allows time for scanning to complete and workshops to be conducted. We utilise Data#3's Data Journey Framework to provide a holistic set of recommendations for your data governance initiatives.

How can Azure Purview help your organisation?

Discovery

Classification

Consumption

Lineage

Azure Purview is a unified data governance service that helps you maximize business value of hybrid data.

Collaboration

Data Controls

Workflow

Integration

Our Framework for Data and Analytics Solutions

- Provides a simplified approach to solutions aligned to business needs
- Meets you where you are at on your own data journey
- Extends from planning and strategy, to implementation and support
- Under continuous improvement, incorporating feedback and lessons learned from client projects
- Aligns with Microsoft Cloud Adoption Framework and reference architectures

Why Data#3 is Different

CUSTOMER CENTRIC

UNDERSTANDING YOUR BUSINESS

Our customer-first approach ensures our people understand your challenges and opportunities

SAFE PAIR OF HANDS

Our Australian presence with consultants, engineers and support teams allow us to develop and maintain deep customer relationships.

VALUE FOCUSED

DATA JOURNEY FRAMEWORK

We created a data and analytics framework based on the client projects and their feedback, to help reduce project risk and simplify your own data journey.

END-TO-END SOLUTIONS

Our end-to-end managed solutions allow us to guide you along your cloud journey. The right solution, every step of the way.

EXPERIENCE

DEEP INDUSTRY KNOWLEDGE

With over 40 years of experience in delivering projects, we have built extensive and deep knowledge across many verticals.

HIGH-END EXPERTISE

Our Azure Expert MSP status and people with the highest certifications, backed up by on-the-job experience.
