Your Data Governance Challenges

Meeting compliance obligations

Understanding value & ROI

Impact to my people

What solutions are available?

Impact to business processes

Knowing where to start

Azure Purview Production Deployment approach

Goal

- Accelerated deployment of Azure Purview in your environment
- Serve as a governance tool for your team to configure additional data sources, classifications and glossary terms
- On-boarding of first set of business users
- Assist with production go-live

Outcomes

- Azure Purview provisioned with a baseline configuration in up to two environments
- Connection of up to twenty (20) data sources and setup of initial scan schedules
- Connection of Power BI, Azure Data Factory and Office 365 sensitivity labels (if deployed)
- Content tagging and custom classification rules and custom scan sets
- Walkthrough of Azure Purview and demonstration of usage
- Recommendations, lessons learned and next steps summary
- As-built documentation

Requirements

- Azure tenancy (up to two environments)
- Cloud data sources supported by Azure Purview
- Access to create resources, resource groups, managed identities
- Access to the cloud data sources (network and permissions)
- Attendance of workshops by technical and business stakeholders

Methods

Our production deployment approach is designed to provide an accelerator to get started with Azure Purview as quickly as possible. You will be able to harness the full features of Purview and provide access to your business users, in context of your own environment. We understand that every organisation is different, and this offering for production deployment of Purview will provide the greatest level of customisation. There are options available for more data sources, enhanced custom classifications, availability considerations and integration with REST APIs. The production deployment is completed over 8-12 weeks, which allows time for scanning to complete and workshops to be conducted. We utilise Data#3's Data Journey Framework to provide a holistic set of recommendations for your on-going data governance initiatives.

How can Azure Purview help your organisation?

Discovery

Classification

Consumption

Lineage

Azure Purview is a unified data governance service that helps you maximize business value of hybrid data.

Collaboration

Data Controls

Workflow

Integration

Our Framework for Data and Analytics Solutions

- Provides a simplified approach to solutions aligned to business needs
- Meets you where you are at on your own data journey
- Extends from planning and strategy, to implementation and support
- Under continuous improvement, incorporating feedback and lessons learned from client projects
- Aligns with Microsoft Cloud Adoption Framework and reference architectures

Why Data#3 is Different

CUSTOMER CENTRIC

UNDERSTANDING YOUR BUSINESS

Our customer-first approach ensures our people understand your challenges and opportunities

SAFE PAIR OF HANDS

Our Australian presence with consultants, engineers and support teams allow us to develop and maintain deep customer relationships.

VALUE FOCUSED

DATA JOURNEY FRAMEWORK

We created a data and analytics framework based on the client projects and their feedback, to help reduce project risk and simplify your own data journey.

END-TO-END SOLUTIONS

Our end-to-end managed solutions allow us to guide you along your cloud journey. The right solution, every step of the way.

EXPERIENCE

DEEP INDUSTRY KNOWLEDGE

With over 40 years of experience in delivering projects, we have built extensive and deep knowledge across many verticals.

HIGH-END EXPERTISE

Our Azure Expert MSP status and people with the highest certifications, backed up by on-the-job experience.
