**Modernise with Surface for the
IT Pro**

Modernise with Surface for the IT Pro

Our solution helps you take control of your hybrid and remote worker devices, ensuring they are secure, up to date and have the right apps for your staff to be productive.

Additionally, our solution enables your organisation to leverage a single platform to manage workstations, organisation-owned mobile devices and BYOD.

One Platform to Deploy and Manage

Intune and Surface

Manage all devices from the cloud

Integrates with Azure AD

Deploy Apps and apply policies to your mobile devices and workstations

Secure your devices by enforcing configuration policies remotely

Windows Autopilot

Automatically join devices to Azure AD, enrol in Endpoint Manager, apply configuration and deploy apps

User-drive, no IT intervention required

Pre-provisioning option to ensure apps and policies are ready before sending the device to the user

Azure Active Directory

Identity management in the cloud

Devices enrolled in Azure AD to authenticate

User access and MFA controlled through Azure AD

Integrate with thousands of apps to provide single sign-on

Taking you through every step of the journey

Pilot Outcomes

- ✓ Automated deployment using Windows Autopilot
- ✓ Leverages Windows 11
- ✓ Microsoft 365 apps deployed as part of the automated build
- ✓ Basic configuration policy applied using Intune
- ✓ Microsoft Updates configured using Intune
- ✓ Intune inventory reporting
- ✓ BitLocker device encryption
- ✓ Basic functionality testing
- ✓ Up to 3 pilot Surface devices deployed

Duration of engagement

**Small to
medium
organisations**

- ✓ A two-three week engagement including workshop, pilot configuration and as-built documentation

**Larger
organisations**

- ✓ We suggest a customised solution to ensure all of your requirements are met and complicated scenarios are considered such as tool migration, implications on in-house applications, authentication and identity.
