

# DEPLOY ASSIST

## Get the maximum value from your Surface Investment

Whether you're looking to transform your organisation, mobilise your sales team, inspire students or improve collaboration, our specialists can help you plan, deploy and manage devices and applications. As Microsoft's largest partner in Australia, Data#3 can make sure you unlock the true value of Surface through Deploy Assist.

### What is Deploy Assist?

Data#3 has built a tailored set of services called Deploy Assist to help you get the most from your Surface devices with Microsoft 365 (M365). This program provides eligible organisations with up to \$20,000 funding<sup>1</sup> to help you streamline the adoption of Surface devices. Deploy Assist will help your organisation minimise the cost of deployment, accelerate productivity and maximise the return of investment for Surface devices in your organisation.

### Microsoft 365 Accelerated Deployment

#### Leverage Modern Management — Faster Onboarding

Data#3's experts work with your team to either build a Proof-of-Concept (PoC) or Production deployment for AutoPilot and Intune.

### Modern Meetings PoC

#### Harness the Power of the Team — Enhanced Collaboration

When you combine the power of Surface Hub, Surface with Windows 10 and Microsoft Teams you have a powerful teamwork solution. This PoC shows how to unlock the power of the team.

### Surface Training and Adoption

#### Microsoft 365 and Surface Adoption — Transform Productivity

Make sure your Microsoft 365, Surface device and Surface Hub adoption is successful. Transform your team's productivity through adoption training to ensure they are more productive.

### Why customers use Deploy Assist for Surface

- Ensure maximum value is obtained through Surface device investments.
- Enhance your people's productivity.
- Reduce IT burden on managing devices, and remove image management dependencies.
- Enhance collaboration across your organisation.

*"The Data#3 solution has freed up the College's IT team to continue its focus on front line innovation and do its part to underpin the better educational outcomes as the College prepares their students for the modern workplace"*

**Solomon Box, Manager ICT Services,  
Ormiston College**

### Apply Now for Deploy Assist

Contact a Surface Specialist to find out how these services can be funded through the Deploy Assist program.

# DEPLOY ASSIST

## Modern Meetings PoC

Look around in your next meeting and calculate the staff cost of that hour. How long does it actually take to start the meeting? On average, we waste six minutes before every meeting hunting call codes, dialing in, getting audio connected, focusing cameras and troubleshooting others' failed attempts to join<sup>2</sup>. Data#3 has built an offering to make your meetings more productive.

## Surface Modern Meetings PoC

The Surface Modern Meeting PoC will help you:

- Experience the value of Surface Hub (if applicable).
- Experience the value of Microsoft Teams.
- Learn how the Surface device ties the experience together.
- Integrate these devices into a test environment.
- Walk through pre-prepared scenarios to showcase how your team can be more productive.

The Surface Modern Meetings PoC starts at \$5,000.00 ex GST.

## Surface Training and Adoption

Help your team unlock productivity, by bringing them up to speed on how to best use, deploy and manage a modern workplace.

## Surface Training and Adoption

Surface Training and Adoption will help you:

- Experience how the Surface device unlocks personal productivity.
- Experience how M365, when combined with Surface, unlocks the power of the Team.
- Learn how Surface Hub can transform meetings and collaboration (if applicable).
- Choose from one of two different streams:
  - **End user Surface training** – Upskill your staff and help them make the most of their Surface devices. Learn how to use your Modern Workplace apps and pen and touch for maximum productivity and get everyone off to a great start.
  - **CXO/IT Surface training** – Inspire your senior management or IT team by bringing them up to speed on the value of Surface and its business potential in your organisation. This is a great way to enthuse leaders so that they share your vision.

The Surface Training and Adoption engagement starts at \$5,000.00 ex GST.

# DEPLOY ASSIST

## Surface Get Modern PoC and Surface Pilot/Deployment

Data#3's Deploy Assist program has two options for Modern Management; a PoC or a production deployment. The first option is to conduct a PoC to prove that the solution will deliver the desired business outcomes. The second option is for a production deployment of the solution as outlined below. The effort below is capped per each engagement.

### Surface Get Modern PoC

Test your IT environment and image capability prior to deployment and prove that the solution will deliver your desired business outcomes. This engagement is structured in two parts. It includes the following activities:

Microsoft Intune – starts at \$5,000.00 ex GST

- Setup Microsoft Intune
- Setup compliance policies
- Setup five security policies
- Upload three Win32 apps and two Line of business MSI installers
- Setup Office 365 Pro Plus

Windows Autopilot – starts at \$5,000.00 ex GST

- Setup Windows Autopilot
- Configure Enrolment Status Page
- Demo the Windows Autopilot deployment as deployed above
- Test the following Windows Autopilot features – device reset, device wipe

Note that at the completion of the PoC, the customer can step-up to full deployment. Specific pricing can be supplied on request.

## Surface Pilot/Production Deployment

Get hands-on help and guidance during your Surface deployment, so you can hit the ground running. This solution can be deployed in production through an engagement that includes the following activities:

- Setup Microsoft Intune and Windows Autopilot
- Setup compliance policies
- Setup five security policies
- Upload three Win32 apps and two line of business MSI installers
- Setup Office 365 Pro Plus
- Configure Enrolment Status Page
- Demo the Windows Autopilot deployment as deployed above
- Configure SCCM\* Co-Management
- Demonstrate how workloads can be moved between SCCM and Microsoft Intune (and back again)
- Setup Desktop Analytics\*\* (note that this will require a Microsoft Azure subscription with Log Analytics)
- Workshop options for conditional access, self-service password reset

\* Note that SCCM must be on current version and in healthy state. If remediation is required, this will be charged at time and materials rates to rectify.

\*\* Note that Desktop Analytics requires Windows 10 E3 or E5 licensing.

The deployment offering is \$20,000.00 ex GST.

<sup>1</sup> Terms and conditions apply. Speak to your Surface Specialist for more information and to find out how much funding your organisation is eligible for.
