

Data#3 Deploy Assist

Get the maximum value from your Surface investment

Data#3 Deploy Assist

What is Deploy Assist?

Data#3 has built a tailored set of services called Deploy Assist to help you get the most from your Surface devices with Microsoft 365 (M365).

This program provides eligible organisations with up to \$20,000 funding to help you streamline the adoption of Surface devices.

Deploy Assist will help your organisation minimise the cost of deployment, accelerate productivity and maximise the return of investment for Surface devices in your organisation.

Deploy Assist Programs

Microsoft 365 Accelerated Deployment

Leverage Modern Management — Faster Onboarding

Data#3's experts work with your team to either build a Proof-of-Concept (PoC) or Production deployment for AutoPilot and Intune.

Modern Meetings PoC

Harness the Power of the Team — Enhanced Collaboration

When you combine the power of Surface Hub, Surface with Windows 10 and Microsoft Teams you have a powerful teamwork solution. This PoC shows how to unlock the power of the team.

Surface Training and Adoption

Microsoft 365 and Surface Adoption — Transform Productivity

Make sure your Microsoft 365, Surface device and Surface Hub adoption is successful. Transform your team's productivity through adoption training to ensure they are more productive.

Why customers use Deploy Assist for Surface

- Ensure maximum value is obtained through Surface device investments.
- Enhance your people's productivity.
- Reduce IT burden on managing devices, and remove image management dependencies.
- Enhance collaboration across your organisation.

Deploy Assist Programs

Surface Get Modern PoC and Surface Pilot/Deployment

Data#3's Deploy Assist program has two options for Modern Management; a PoC or a production deployment. The first option is to conduct a PoC to prove that the solution will deliver the desired business outcomes. The second option is for a production deployment of the solution as outlined below. The effort below is capped per each engagement.

Surface Get Modern PoC

Test your IT environment and image capability prior to deployment and prove that the solution will deliver your desired business outcomes. This engagement is structured in two parts. It includes the following activities:

- Microsoft Intune – Starts at \$5,000 ex GST
- Windows Autopilot – Starts at \$5,000 ex GST

Surface Pilot/Production Deployment

Get hands-on help and guidance during your Surface deployment, so you can hit the ground running. This solution can be deployed in production through an engagement that includes the following activities:

- Set up Microsoft Intune and Windows Autopilot
- Set up compliance policies and (5) security policies
- Set up Office 365 Pro Plus
- Configure Enrolment Status Page and demo Windows Autopilot deployment as deployed above
- Configure SCCM* Co-Management
- Set up Desktop Analytics ** (requires Azure subscription with Log analytics).

* Note that SCCM must be on current version and in healthy state.

** Note that Desktop Analytics required Windows 10 E3 or E5 licensing.
