Office 365 Readiness & Planning

You made your choice and want to start using Microsoft Office 365 for productive work and working together more powerfull and efficiant.

The next steps are pending and the possibilities are diverse. Office 365 offers a multitude of services and delivery concepts: your business processes and the requirements however, your employees should provide the solution design. Because the analysis of the user groups and the selection of the corresponding services are the basis for the value-adding use of Office 365.

Workshop for well-founded solution design

With this Readiness & Planning workshop we will work together with you to plan a tailored strategy for deploying your cloud solution with Microsoft Azure. One day at your site and one day in-house for design. Our Azure experts will clarify application scenarios and specific requirements with you in advance and give you the necessary overview of the Azure Cloud portal to develop and define a granular implementation.
