

PILOT

Datacom's Azure Virtual Desktop Standard 5-WK Pilot

Assist your organisation in establishing robust groundwork for initiating the assessment of AVD advantages and expediting the adoption of AVD.

Datacom's Azure Virtual Desktop (AVD) Standard Pilot will enable a solid foundation set up to start evaluating the benefits of AVD and accelerate the Azure cloud adoption.

The 5 week pilot includes:

- AVD Pilot requirements assessment
- AVD Pilot discovery workshop
- AVD Pilot success criteria.
- AVD Pilot solution high-level design.
- A fully functional AVD environment with Azure AD join authentication
- One managed master image
- Five standard apps (Office 365, Teams, OneDrive, Adobe Reader and Google Chrome, integrated with the master image)
- Two line of business apps of your choice to integrate with the master image
- Integration with your current web security solution.
- Integration with your current endpoint security solution
- 10 hour support package for up to 2 weeks of user awareness training testing
- Document workload performance and health, workload compatibility, dependencies, environment sizing mapping
- Next steps workshop
- A dedicated project manager who oversees the AVD Standard Pilot delivery.

Key benefits

Precise control and visibility of your desktop.

Improved security profile and posture.

Empowering and supporting your people and the way they want to work.

Efficient and centralised deployment of software and updates to your business devices.

Enable your team work anywhere in a cost effective way

We are facing new challenges when it comes to effectively enabling how people interact with each other to deliver and realise value. Organisations are needing to deliver better business agility and responsiveness, and more people are approaching work with the expectation of operating remotely.

Azure Virtual Desktop provides a secure and convenient way for your organisation to deliver a virtualised Windows desktop experience to your employees, regardless of location. Datacom's AVD service helps you deploy and manage your environment with minimal effort. AVD delivers scalability and new ways of working remotely, helps enable rosters and seasonal staff, and your people can use their own devices if desired. Don't compromise on experience or operational security – set up the basis for a Windows Evergreen environment.

Datacom works with organisations and communities across Australia and New Zealand to make a difference in people's lives and help organisations use the power of tech to innovate and grow. Our vision is to enable our customers and communities to thrive and shape their own futures.

Built on strong values, Datacom has grown to be one of Australasia's leading locally-owned technology businesses, with more than 6,500 people and \$1.49 billion in revenue.

We have a track record of success in working with government agencies and companies at SME and enterprise level, and our teams are always solving for greater security, higher productivity, a more sustainable future, and to build better digital experiences for our customers.
