DATACOM

IMPLEMENTATION

Datacom's starting with Microsoft 365 Copilot

We help you roll out Microsoft 365 Copilot across your organisation with a clear, guided roadmap. From activation to training and use case development, we remove adoption barriers so your people can quickly unlock productivity gains with AI.

Datacom's roadmap for starting with Microsoft 365 Copilot makes it easy to roll out Copilot across your entire organisation. We take you from setup to measurable results with a guided enablement experience that builds skills, confidence and productivity. Many organisations are excited by Copilot's potential but face roadblocks such as unclear starting points, staff hesitation and no defined use cases to prove value.

To remove those barriers, we start by enabling and configuring Copilot for all staff you choose. Then we provide engaging training, a quick-reference knowledge article and interactive sessions, to help your people understand and use Copilot effectively.

Next, we work with you to uncover a high-impact first use case using a custom Copilot agent to gather employee insights. Once identified, we help implement and measure this use case so you can demonstrate real productivity gains early on.

With Datacom, you'll accelerate adoption, streamline workflows and empower staff to get more done with AI. Our approach ensures Copilot becomes an integral, high-value part of how your organisation works.

Key benefits

Accelerated, confident adoption
We ensure your organisation moves from Copilot curiosity to active, confident use quickly. By combining technical activation, hands-on training and ongoing guidance, your people not only know how to use Copilot but actively integrate it into daily work from day one.

Measurable productivity gains
With our structured approach to identifying and implementing high-value use cases, you'll see tangible efficiency improvements fast. We help you track and measure impact so you can demonstrate return on investment and scale success across your business.

Your shortcut to success with Microsoft 365 Copilot

How we do it

01 Kick-start
Turn on and configure Microsoft 365 Copilot across your organisation.

02 Enable and educate
Deliver targeted training, resources and support to build confidence and capability.

03 Use case discovery
Uncover high-value, organisation-specific scenarios that deliver measurable results.

04 Realise the value
Implement use cases, embed them into workflows and track the impact.

Many organisations are eager to use Microsoft 365 Copilot but face roadblocks, such as unclear starting points, low user confidence and no clear way to measure impact. Datacom's roadmap removes those barriers so you can roll out Copilot to all staff with confidence and speed. We handle activation, deliver targeted training and help identify high-value use cases that prove return on investment fast. We combine technical setup, practical education and measurable outcomes so Copilot becomes an everyday productivity tool, not unused tech. From overcoming adoption hurdles to embedding AI into daily workflows, we make sure your teams get the most from Copilot from day one.

Experience the Datacom difference

At Datacom, we help leaders across a broad range of industries including finance services, government, healthcare, education, retail, and manufacturing to tap into the power of Microsoft Dynamics 365 and its Power Platform. By doing so, our customers have been able to accelerate time to value, speed up innovation, and drive benefits for their customers, employees, and organisations.

Our technical and information management experts are some of the best in the world and have a wealth of knowledge and experience that allows us to quickly identify areas of risk and opportunity. Datacom's deep knowledge of Microsoft technologies and our solid partnership means we're committed to being your trusted partner, navigating you towards achieving success and maximising your investment in Microsoft Dynamics 365.
