

CONSULTING

Datacom's consulting services for Microsoft Entra

Datacom provides consulting and expertise in technology delivery to guide and accelerate cybersecurity and identity through Microsoft Entra.

We provide a “trusted cloud” outcome around data, applications and people, and helps organisations secure access for all users, including workforce, partners, external customers or high-strength identity proofing of new users.

Why Datacom Microsoft Entra consulting?

Datacom's Entra offering helps reduce administrative costs, improve timeliness and accuracy via automation, provisioning, governance policy and self-service. We will set up a successful Zero Trust security strategy for your organisation using key Entra products, including:

Entra ID Governance

Automates onboarding and user access entitlements via requests, approvals, reviews and automated lifecycle workflows.

Entra Verified ID

Provides high-strength, low-friction identity verification using digital wallets and the verifiable credentials standards. We have the skills and knowledge to build a highly trusted identity fabric using the Entra Verified ID technology between your organisation and your people.

Azure AD B2C

As this is still the current state for many organisations, we provide skills to build, maintain and extend Azure AD B2C custom policies. We are also experienced with identity migrations to help organisations on a path towards Microsoft's future strategy based on Entra.

Key benefits

Expert guidance

Specialised knowledge and best practices ensuring effective implementation and management of Entra solutions.

Cybersecurity based on Zero Trust

Using identity in a security practice in hybrid cloud and multi-cloud environments.

Secure access to modern work and Copilot

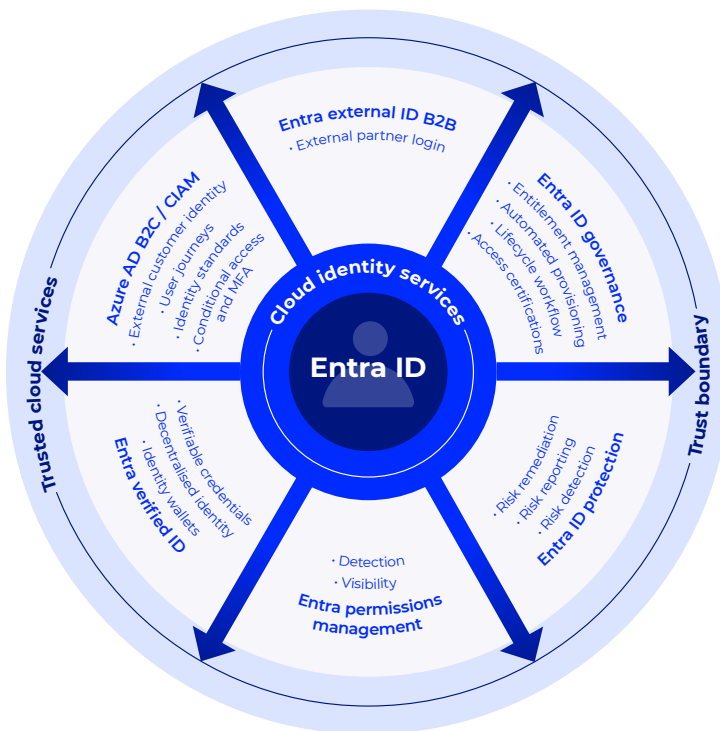

Microsoft Entra is key to securing Microsoft 365, Copilot and device security.

Automated provisioning and governance

Reduce the administrative effort of user accounts as they join, move or leave organisations.

Drive agility. Reduce risk. Trust Entra.

Microsoft Entra is your gateway to a secure, unified identity and access management solution for the modern enterprise. Built for a Zero Trust world, Entra empowers organisations to protect access to any app or resource across cloud, on-premises and hybrid environments.

With Entra, you can verify every identity, enforce least-privilege access and ensure continuous trust. It simplifies identity governance, streamlines user lifecycle management and enhances compliance with intelligent automation.

Datacom and Microsoft Entra secures remote work, manages third-party access and builds identity into your apps, while delivering the tools and insights you need.

Backed by Microsoft's global scale and security expertise, Entra helps you stay ahead of evolving threats while enabling seamless, productive experiences for users.

Datacom works with organisations and communities across Australia and New Zealand to make a difference in people's lives and help organisations use the power of tech to innovate and grow. Our vision is to enable our customers and communities to thrive and shape their own futures.

Built on strong values, Datacom has grown to be one of Australasia's leading locally-owned technology businesses, with more than 6,500 people and \$1.49 billion in revenue.

We have a track record of success in working with government agencies and companies at SME and enterprise level, and our teams are always solving for greater security, higher productivity, a more sustainable future, and to build better digital experiences for our customers.
