DATACOM

Managed Microsoft security services by Datacom

Datacom's cyber defence operations centre (CDOC) delivers 24/7 managed security services, utilising Microsoft Defender solutions (Endpoint, Identity, Office 365, Cloud Apps) and Microsoft Sentinel for comprehensive SIEM capabilities. CDOC provides centralised monitoring, advanced threat detection and rapid incident response offered either as integrated protection or tailored standalone services to suit your organisation's needs.

To protect your organisation against sophisticated cyber threats, Datacom's cyber defence operations centre (CDOC) provides comprehensive, 24/7 managed security services.

Leveraging Microsoft's advanced security technologies, including Defender for Endpoint, Identity, Office 365, Cloud Apps and Sentinel for SIEM, our CDOC delivers centralised monitoring, real-time threat detection and rapid incident response.

Our offerings can be integrated or tailored as standalone solutions, and we ensure efficient containment and response, helping minimise the risk of breaches, ransomware and insider threats while strengthening your overall security posture. Our expertise is demonstrated through all four Microsoft security advanced specialisations, reflecting our commitment to delivering services aligned with Microsoft's highest standards.

Key benefits

Powered by Microsoft Sentinel
Full threat visibility:
See what's happening across your environment in real time.

Faster incident response:
Automate and speed up how you respond to security threats.

Powered by Microsoft Defender
Protect your devices and data:
Secure your data with Microsoft Defender Endpoint Protection seamlessly integrated with Microsoft 365, Azure and Intune.

Unified security management:
With advanced defence against malware and attacks, you can keep your business secure across devices and cloud services.

Managed Microsoft security services

Our managed Microsoft security services include onboarding, configuration, continuous monitoring and reporting integrated into your existing infrastructure and Microsoft subscriptions. Leveraging the Microsoft Defender suite, Sentinel, Entra ID, Microsoft 365 Security, Azure Firewall and Purview, we provide end-to-end security solutions to address regional challenges.

Datacom, a leading Asia-Pacific IT services provider, holds all four Microsoft security advanced specialisations. With certified expertise in Defender, Sentinel and Entra, we deliver services aligned with Microsoft's highest standards.

Operating from local centres in New Zealand (Wellington, Auckland) and Australia (Brisbane), we offer hands-on support and rapid response, safeguarding public and private organisations with tailored security solutions.

With decades of experience and a strong Microsoft partnership, Datacom ensures secure, scalable and innovative digital resilience. Our flexible engagement models deliver customised support, meeting evolving security needs while driving growth.

Experience the Datacom difference

At Datacom, we help leaders across a broad range of industries including finance services, government, healthcare, education, retail, and manufacturing to tap into the power of Microsoft Dynamics 365 and its Power Platform. By doing so, our customers have been able to accelerate time to value, speed up innovation, and drive benefits for their customers, employees, and organisations.

Our technical and information management experts are some of the best in the world and have a wealth of knowledge and experience that allows us to quickly identify areas of risk and opportunity. Datacom's deep knowledge of Microsoft technologies and our solid partnership means we're committed to being your trusted partner, navigating you towards achieving success and maximising your investment in Microsoft Dynamics 365.
