

ASSESSMENT

# Tenancy health check for Microsoft 365 by Datacom

Get expert insight into your Microsoft 365 setup with Datacom's tenancy health check. We assess your tenant's security, identity and collaboration settings, then provide a clear report with risks, gaps and recommendations to keep your environment secure and efficient.

Datacom's tenancy health check for Microsoft Dynamics 365 is a comprehensive assessment designed to give you clarity and confidence in your tenant's configuration.

We review your environment across key areas — including global settings, identity and access management and collaboration controls — to identify potential risks, inefficiencies and misalignments with best practice.

This review is guided by our Microsoft expertise and industry standards. Our team examines your setup in detail, looking at everything from MFA and conditional access to guest access policies, Teams sharing settings and OneDrive configurations.

You'll receive a findings report that highlights gaps and offers prioritised recommendations for remediation. If you're looking to tighten security, prepare for an audit or ensure your Microsoft 365 tenant is running as it should, this assessment gives you a solid foundation to act with confidence.

# Key benefits

## Identify risks early

Surface misconfigurations and vulnerabilities before they impact your organisation.

## Strengthen security posture

Gain recommendations to improve identity, access and collaboration controls.

## Optimise tenant configuration

Ensure your Microsoft 365 environment is set up for efficiency, compliance and performance.

## Act with confidence

Back your decisions with expert analysis and a clear, prioritised remediation plan.

# Tenancy health check for Microsoft 365 in two weeks
