

PROOF OF CONCEPT

Datacom's Windows Autopilot: 3-Wk Proof of Concept (PoC)

With more and more people approaching work with the expectation of being able to operate remotely, organisations are facing new challenges when it comes to effectively managing the ways people interact with each other to deliver and realise value.

Modern device management allows organisations to break the shackles of legacy deployments. Datacom can provide you with the management tools to allow zero touch provisioning for the modern distributed workforce through Intune.

Deliver new ways of working remotely, get support of new hardware models quickly, and set up the basis for a Windows Evergreen environment.

1. Stable foundations

Datacom will rapidly deploy a baseline configuration with security at the centre while maintaining flexibility to suit your environment.

2. Provision any device from anywhere, any time

Unlock the power of provisioning devices anywhere that has an internet connection.

3. People empowerment

Empower your people to provision their devices remotely, allowing them to access their data and applications securely.

Key benefits

Precise control and visibility of your devices.

Improved security profile and posture.

Empowering and supporting your people and the way they want to work.

Efficient and centralised deployment of software and updates to your business devices.

What is Datacom's Windows Autopilot PoC?

“Establish” looks to set the foundations of your environment which can then be built upon through “Evolve”.

Increase business value and further your investment in modern device management by building on the “Establish” phase.

Datacom will deliver additional security benefits and features to evolve your PoC.

“Evolve” consists of several packages designed to allow your organisation to select the specific solutions that are relevant to your requirements.

Each “Evolve” engagement is available individually or as a combination. Additional information on each package is available on request.

Datacom works with organisations and communities across Australia and New Zealand to make a difference in people's lives and help organisations use the power of tech to innovate and grow. Our vision is to enable our customers and communities to thrive and shape their own futures.

Built on strong values, Datacom has grown to be one of Australasia's leading locally-owned technology businesses, with more than 6,500 people and \$1.49 billion in revenue.

We have a track record of success in working with government agencies and companies at SME and enterprise level, and our teams are always solving for greater security, higher productivity, a more sustainable future, and to build better digital experiences for our customers.
