

DATAFOX CALLS for MS TEAMS

Datafox' Teams Call solution helps you bring customer communication together with team communication in one single solution.

You can now call out and take calls in Teams, reducing the need for multitasking and switching between solutions.

This solution is for the companies that have a heavy information flow and need to speed up processes bringing all the work to the same place. It is also suitable for making the work process smoother and more convenient.

Bringing together Teams Call and Datafox PBX solution we can provide you just that - a seamless efficient communications process - all in one place.
