# Refactoring, Building & Maintaining Azure Data Factory - ETL Pipelines

Optimizing Azure Data Factory Pipelines for Performance & Scalability

Azure Data Factory

Azure Cosmos DB

Azure
DB
For POSTGRES

#### The Challenge

Inefficient ADF Pipelines causing high processing times and costs

Need for secure & scalable ETL workflows with Azure Cosmos DB & PostgreSQL

Data silos & performance bottlenecks impacting analytics

**Lack of proactive monitoring & issue resolution** for seamless operation

#### What We Offer

## Refactoring, building, and maintaining Azure Data Factory-ETL pipelines for

Performance
Optimization –
Reduce latency &
processing costs.

Seamless
Integration –
Connect Azure
Cosmos DB &
PostgreSQL
efficiently.

Scalability & Reliability – Future-proof data transformation workflows.

End-to-End
Monitoring &
Support – Ensure
pipeline health &
minimize failures.

#### What We Offer

Refactoring
Existing Azure Data
Factory Pipelines

Optimize query performance & cost efficiency.

Redesign data transformation logic for accuracy.

Implement error handling & monitoring.

Design scalable ETL workflows from Cosmos DB to PostgreSQL.

Implement incremental data loading & transformations.

Ensure **security & compliance** with best practices.

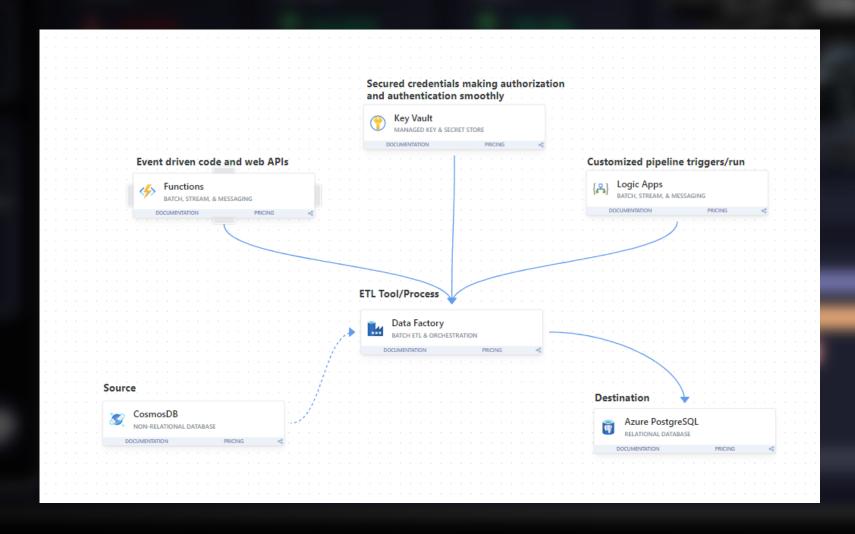

Proactive monitoring & troubleshooting.

Automated alerts & performance tracking.

Regular data quality checks & governance.

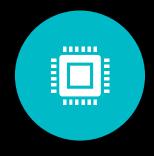

#### Sample Architecture of Migration

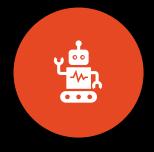

#### **Key Benefits**

IMPROVED
PERFORMANCE –
FASTER DATA
PROCESSING &
REDUCED COSTS.

SCALABILITY –
FUTURE-READY ETL
PIPELINES
SUPPORTING
BUSINESS GROWTH.

RELIABILITY &
MONITORING –
AUTOMATED ISSUE
RESOLUTION &
ALERTING.

SECURITY &
COMPLIANCE –
ENSURING DATA
GOVERNANCE BEST
PRACTICES.

#### **Key Deliverables**

- Optimized & Scalable ETL Pipelines Faster, cost-effective data transformations.
- Comprehensive Data Integration Seamless data flow from Azure Cosmos DB to PostgreSQL.
- Automated Error Handling & Alerts Proactive issue resolution.
- Secure & Compliant ETL Workflows Data governance & access control.
- Performance & Cost Optimization Reduced latency and improved efficiency.
- End-to-End Documentation & Knowledge Transfer For easy management.

### Cost-Free Proof of Concept (PoC)

We offer a **free PoC** to showcase the benefits of Power BI before committing to a full migration. Experience improved analytics and performance risk-free!

#### Why Choose Us?

Azure Data Engineering Experts – Specializing in ADF, Cosmos DB & PostgreSQL.

End-to-End Service – From optimization to monitoring & support.

Secure & Scalable Solutions – Designed for enterprise use.

Proven Track Record – Success in complex data migrations & ETL automation.
