BETTER DATA – DRIVEN DECISIONS*

Migrate Oracle Analytics Server (OAS) to Microsoft Power BI

Transforming Legacy Oracle Reporting into Modern, Interactive Analytics

ORACLE®

ORACLE ANALYTICS CLOUD

Microsoft Fabric

Power BI

The Challenge

Legacy Oracle
Analytics Server
limiting flexibility
and performance

High maintenance
and upgrade costs
for on-prem
environments

Static dashboards
with limited
interactivity and AI
insights

Complex sharing
and restricted
collaboration

Lack of integration
with cloud data
platforms like
Microsoft Fabric

What We Offer

End-to-end migration from Oracle Analytics Server (OAS) to Microsoft Power BI

Rebuild reports, dashboards, and KPIs using Power BI's modern visualization tools

Integrate data models with **Microsoft Fabric Lakehouse or Warehouse**

Enable Power BI Service for collaboration, sharing, and mobile access

Configure governance, security, and monitoring aligned with Microsoft standards

Key Benefits

Modern Visualization

- Interactive reports and AI-driven analytics in **Power BI**

Collaboration

- Share insights securely across your organization

Performance

- Faster rendering and optimized data models

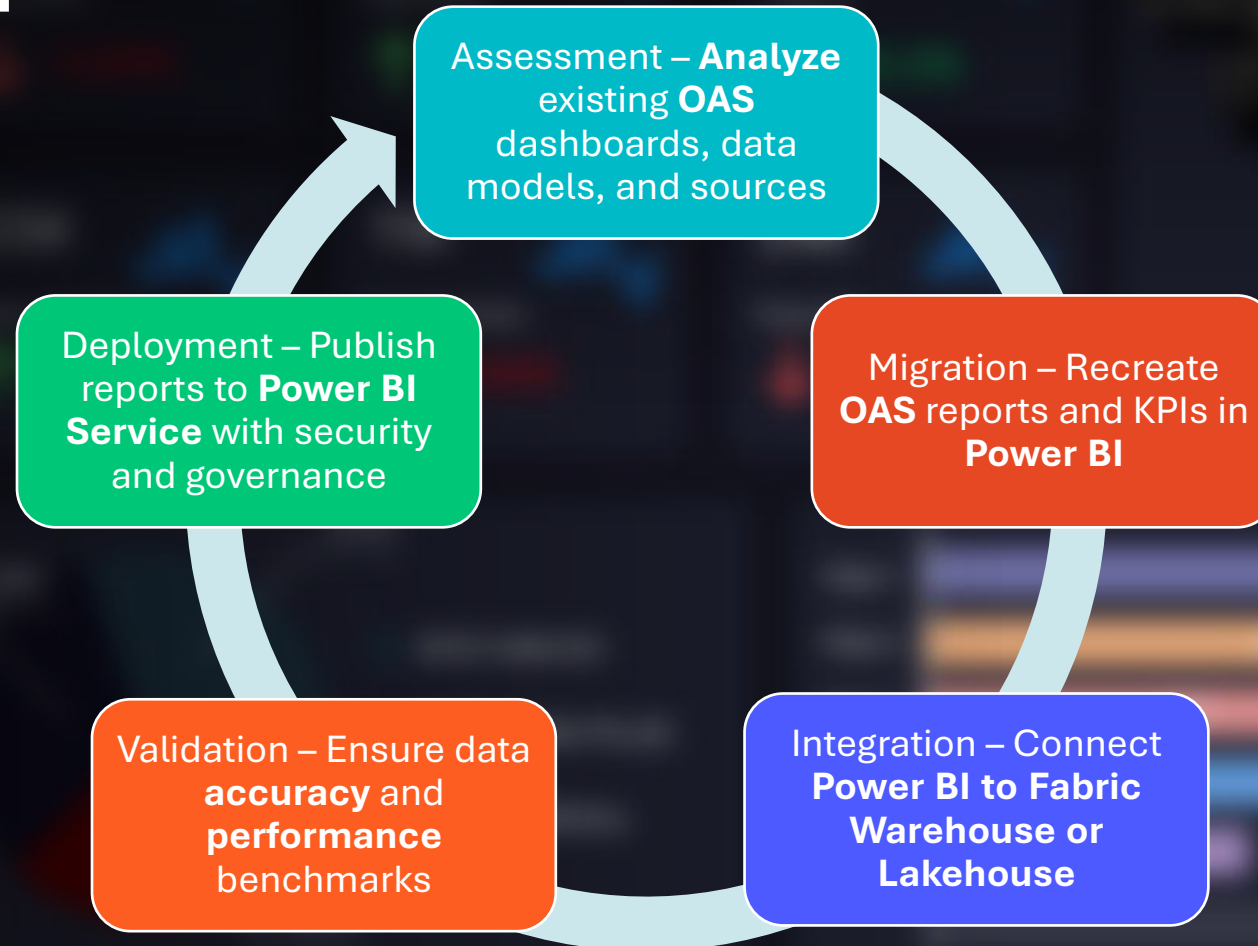

Governance

- Built-in row-level security and workspace access control

Integration

- Seamless connectivity with Fabric datasets and **OneLake**

Our Approach

Key Deliverables

Converted
Power BI reports
replicating OAS
dashboards

Integrated
Fabric-based
datasets

Governance
setup with role-
based access

Documentation
and operational
handover

Training for
business users
and
administrators

Cost-Free Proof of Concept (POC)

Experience Power BI's modern analytics before full migration

Scope

- Convert sample OAS reports into Power BI
- Connect to Fabric or existing datasets
- Validate visuals, performance, and collaboration features

Deliverables

- Operational Power BI report and dashboard
- Performance and usability comparison report

Why Choose Us?

Microsoft Power BI & Fabric Experts – Proven experience migrating Oracle Analytics workloads

Comprehensive Framework – From assessment to deployment and governance

Enterprise Security – Role-based access, audit, and compliance features

Funding Opportunities – Collaboration with Microsoft to assess ECIF funding eligibility for qualified projects

Free PoC – Validate Power BI's capabilities and ROI before full rollout
