datapine
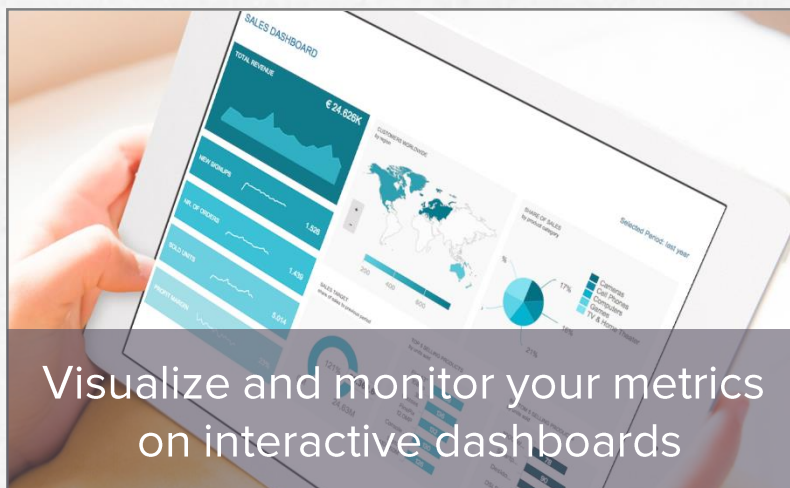

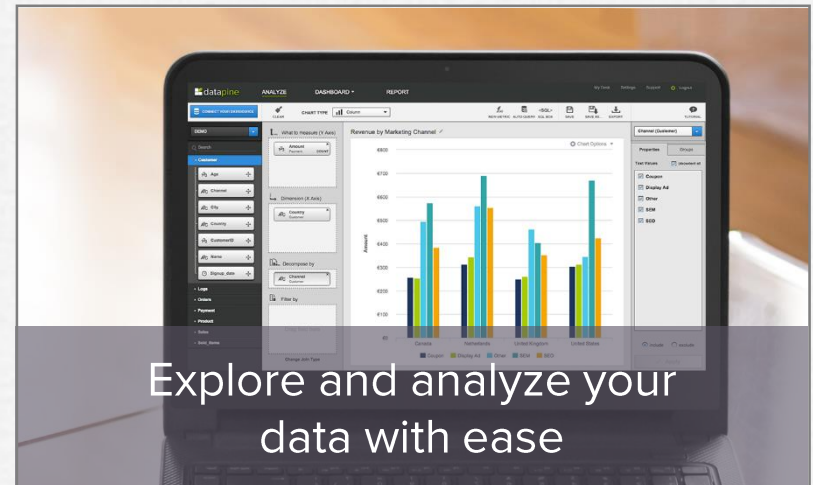

The new workspace for Business Analysts

datapine combines all aspects of professional data analysis in an inutitive, powerful interface

Connect and combine all your data sources

Explore and analyze your data with ease

Visualize and monitor your metrics on interactive dashboards

Communicate your insights across and outside your organization

**CONNECT** all your data sources within minutes and start combining data from different internal or external sources right away.

- Connect you data source within a few clicks – **no restructuring** required

- **Combine** different data sets without the need of building a data warehouse

- Enrich your data by including **3rd party connectors** such as ERP systems, CRMs or Google Analytics

and many more

EXPLORE your data in the most flexible ways. We provide you the right tools to analyze your data efficiently, all without any technical skills required.

- Build you own charts and metrics using our intuitive **drag&drop interface**

- Represent your data in the most meaningful way with our wide selection of **visualization options**

- Create you own metrics and formulas within a few clicks and perform the most **advanced calculations**

MONITOR the most important KPIs in real-time on professionally styled, interactive dashboards with dynamic content. All your metrics in one place.
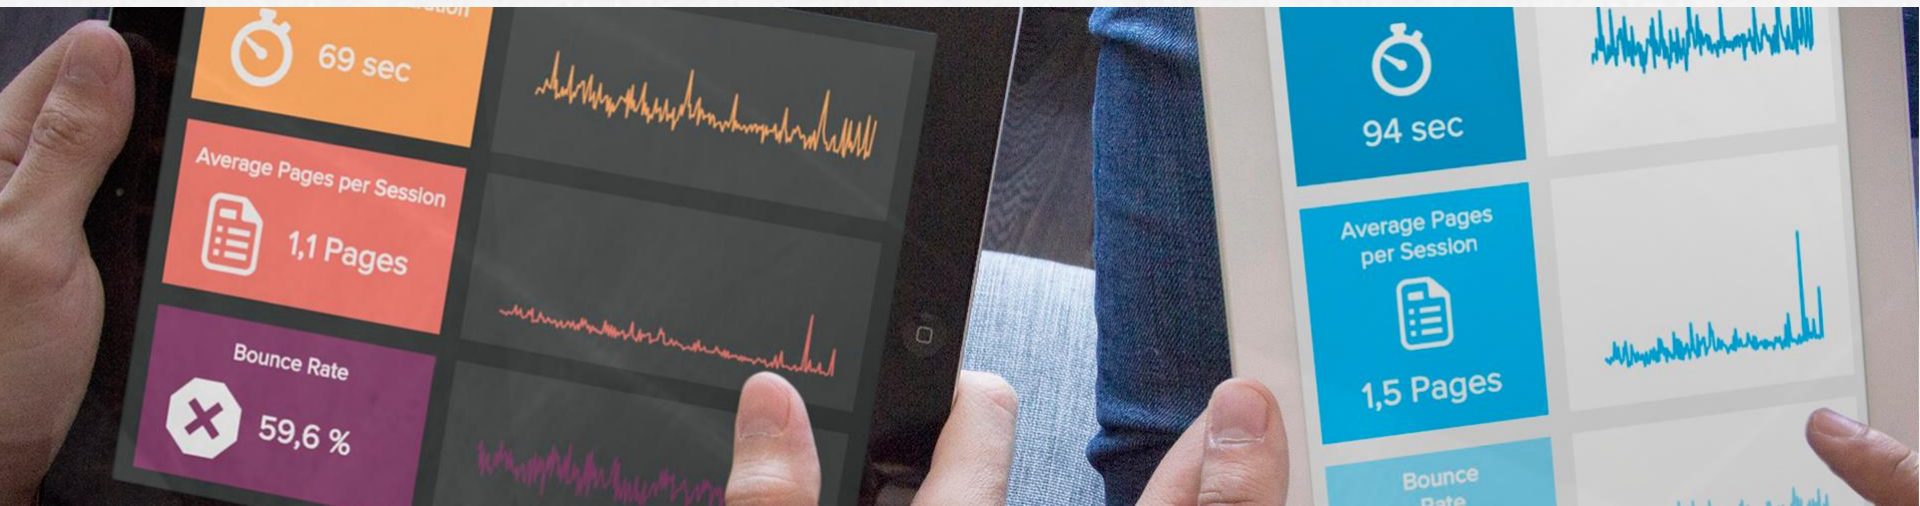

- Build beautiful real-time dashboards using simple **drag&drop**, similar to Powerpoint

- **Filter**, **zoom** or **drill-down** to the level of granularity that you need to answer all your questions

- Access all dashboards from any **tablet** or **mobile** device

SET AUTOMATED ALERTS based on artificial intelligence that learn from your historic patterns and inform you as soon as something unexpected happens.

NEW

- Set our **smart alerts** and never miss an unexpected risk situation or business opportunity again

- Our real-time alert system based on **neutral networks** continuously checks all relevant metrics and **saves you valuable time**

SHARE your insights with your colleagues, management or external parties or embed you interactive dashboard in 3rd party applications.

We offer following sharing options

- Share a dashboard with **individuals** and **user groups** and securely manage access rights.

- Create a **public link** and make your dashboard accessible via URL – password protected if required

- Enhance you own application by **embedding** our dashboard

Whatever data, source or format, we professionally visualize your information.
