Microsoft Power Platform Consulting Services

Data Semantics specializes in creating device agnostic apps to digitize business processes, integrating both external and internal data systems and democratizing the availability of relevant tools as well as data across workforce.

The team leverages the power of low-code application development using Microsoft PowerApps to turn customer requirements into robust applications.

Get in touch with Data Semantics to conduct discovery workshops, learn from their experiences, discuss your requirements and jointly come up with a roadmap for your digital journey.

A sample of PowerApps developed by Data Semantics

### Cash in Motion App: Get complete visibility of your cash-in-transit

Applicable to all retailers or service providers with multiple cash collection points, Cash in Motion App tracks physical cash in real time and integrates the current state with ERP.

Petty Cash App: For greater visibility and simpler petty cash management

Petty Cash Management App is a one-stop platform to manage petty cash expenses and reimbursements on a day-to-day basis.

Q Memo App: Q-Memo | Multi-Purpose Request, RFI & Approval App

An Information Distribution Platform that offers visibility of usually unorganized memos and reduces bottlenecks in approval workflow.
