

AI platform for faster, cheaper, and more accurate case handling across industries

What is it?

Imagine a smart assistant that reads all claim documents for you and says: **"Here is the summary, here is my recommendation. The decision is yours."**

How does it help?

- Saves hours of document searching — reads everything for you
- Proposes a resolution and calculates the payout — you just approve
- Ask it anything about a case, just like asking a colleague
- Everything in one place — cases, documents, analytics
- Your data stays with you — security and compliance covered
- Custom workflows tailored to your needs

How does it work?

1. A claim arrives (email, portal, anything)
2. AI reads documents, photos, and calls
3. Prepares a summary and decision proposal
4. A human approves or adjusts — done

Results

10× faster case processing

70% savings on claims processing costs

96.8% accuracy in decision-making

Not just an AI add-on. A complete system for process management.
