

Veil

OIA & LGOIMA Disclosure Platform — a Clarivus AI product from DataSing Ltd

Not just redaction. Defensible OIA and LGOIMA disclosure.

10,000+	23	100%	60–70%
Docs per request	Statutory grounds	NZ-owned & operated	Projected time saved

Key capabilities

- Two-layer AI detection — NZ-specific pattern matching plus contextual analysis for commercial sensitivity, legal privilege and free & frank opinions
- Every redaction linked to a statutory ground (s6, s7, s9, s17) with public interest test enforcement
- Tiered review workflow: Reviewer → Senior Reviewer → Final Approver, with full version history
- Permanent, verified redaction at the data level with multi-pass export checks
- Immutable, SHA-256 hash-chained audit trail — Ombudsman-ready export packages
- Bulk processing at scale: 5,000 pages in under 4 hours; duplicate detection across 10,000 documents in under an hour

Security & data sovereignty

- NZ-owned, Wellington-based — no offshore contractors access customer data
- Hosted on Microsoft Azure (Australia East today; Azure New Zealand North on the roadmap)
- Microsoft Entra ID SSO with MFA, SCIM 2.0 provisioning, role-based access control
- AES-256 encryption at rest and in transit; independent penetration testing available
