

OCR AP (Accounts Payable) Automation is a cutting-edge solution that revolutionizes the way businesses handle their financial processes. OCR stands for Optical Character Recognition, which is the technology that enables the conversion of physical documents into editable digital formats, automates data entry, and streamlines document management.

HOW OCR AP AUTOMATION WORKS?

- Input Image or PDF Documents from multiple data sources: Cloud Storage, Email. E.g. Invoice image.
- OCR scans the document and extracts data.
- OCR ensures accuracy and compliance during data verification.
- Seamlessly update data in CRM, ERP, or any target business application. E.g.: Invoice in ERP created.
- Create and assign relevant workflows, e.g., Approval Workflow once data is uploaded.
- Post finance or follow-up documents within ERP/CRM.
- Flag issues if data is wrong or the process is not automated.
- Get real-time insights from data entered in the system.
