

DB Booster

Your productivity superpower

DB Booster

DB Booster is an AI agent that saves the most precious commodity in the world — your time.

DB Booster

Better productivity at lower costs is a dream come true.

- Higher productivity: Well-performing applications increase end-user productivity, which leads to higher revenue.
- Lower costs: Performance tuning lowers costs for both HW and SW (licensing).
- Efficiency: Stop losing valuable time to preventable delays.

Who is DB Booster for?

- **Businesses of All Sizes:** Whether you're a small startup or a large enterprise, DB Booster ensures your databases run efficiently, enabling faster applications and better user experiences, regardless of scale.
- **Database Administrators (DBAs) + Developers:** Simplifies their work by automating performance tuning, saving time, and delivering expert-level optimizations.
- **IT Teams:** Enhances system performance and productivity while reducing the burden of manual database tuning.
- **Application Developers:** Removes bottlenecks in applications caused by database inefficiencies without requiring deep database expertise.

How Does It Work?

Smart, Simple, and Powerful.

AI tunes the database, offering the following advantages:

- It is quick: AI delivers optimizations in hours, not days.
- Optimize the database, not the application—ensuring no new bugs.
- Works with third-party applications: Tune applications you didn't build, including off-the-shelf solutions.
- Massive speed improvements: Achieve 10x, 100x, or even 1000x faster performance with no downtime.

Free Tier = Risk-Free Optimization

- Try DB Booster for Free.
- Experience the power of DB Booster without any risk. Analyze your database for free — we even cover the AI costs. You decide whether to proceed with optimizations or implement changes yourself.
- Please, contact our support team via the form or using support@dbbooster.com to get your customer credentials.
