ransomware attacks occur

CLOUD-BASED DATA IS STILL VULNERABLE TO ATTACKS AND OUTAGES

In the era of remote work, more businesses are moving their applications to the cloud. While hybrid and distributed environments offer flexibility in how enterprises structure their workforces, they also carry risks. Planned or unplanned outages, as well as malicious attacks, can have dire costs both financially and to a company's brand.

Under the shared responsibility model used by cloud providers, customers are responsible for securing their data from the dangers of ransomware and cybersecurity attacks, so it is crucial to have a strong data protection solution in place. The right data backup solution will allow you to ensure your data is protected and available across all environments, at any scale.

VERITAS NETBACKUP PROTECTS YOUR DATA AT ANY SCALE ON AZURE

Protect your data from ransomware or unexpected downtime with NetBackup from Veritas, deployed on Microsoft Azure. NetBackup is a unified solution to back up and secure your data seamlessly, regardless of how complex your enterprise data environment is. NetBackup scales to even the greatest workloads, so no matter how large your company grows, NetBackup will adjust to handle your needs.

NetBackup and Azure ensure your data is easy to migrate and recover, so you can keep your business running and meet your compliance needs.

INFINITELY SCALABLE

No matter how your workload grows, NetBackup elastically scales to fit your business needs.

RAPID RECOVERY

Restore your data with near-zero downtime in the event of an unplanned outage, so your business doesn't miss a beat.

FLEXIBILITY

NetBackup works with Azure or other cloud storage services, and handles workloads across hybrid and multicloud environments.

EASY MANAGEMENT

Manage your entire data ecosystem from one console.

A PROVEN SOLUTION FOR ENTERPRISE-GRADE BACKUP

NetBackup globally

15-time Leader

Gartner Magic Quadrant for
Data Center Backup and
Recovery Solutions

ULTIMATE FLEXIBILITY, SCALABILITY, AND SIMPLICITY FOR YOUR BACKUP

Recover quickly

Automate backups
across storage methods
and instantly restore if
disaster strikes.

Get key insights

Easily plan out your
future needs and
budget with access
to accurate, near
real-time reporting on
your data.

Back up faster

With NetBackup
Accelerator, only back
up blocks that have
changed, saving time
and resources as your
workload grows.

Limit complexity

Whatever operating
systems or data storage
methods you use,
NetBackup streamlines
migration and recovery.

Tune operations

Tailor access to
different roles within
your organization, so
critical data can be
accessed only by those
who need it.

ABOUT VERITAS

Veritas Technologies is a global leader in data protection, availability, and insights. Over 80,000 customers—including 87 percent of the Fortune Global 500—rely on us to abstract IT complexity and simplify data management.

The Veritas Enterprise Data Services Platform automates the protection and orchestrates the recovery of data everywhere it lives, ensures 24/7 availability of business-critical applications, and provides enterprises with the insights they need to comply with evolving data regulations.

With a reputation for reliability at scale and a deployment model to fit any need, the Veritas Enterprise Data Services Platform supports more than 800 different data sources, over 100 different operating systems, more than 1,400 storage targets, and more than 60 different cloud platforms.
