

Dedalus Atlas

[INSERIR NOME] | xx.xx.2025

Why do companies need continuous Data & AI services?

Decision based
on intuition

Companies still
decide this way

Disorganized
data

Data is treated as
disposable, as it is
not understood,
remembered or
analyzed

Efficiency

Of data investments
not analyzed for
their ROI

Thinking about it:

Dedalus created Atlas.

The client chooses the Dracmas package that best suits their needs and receives support in sustaining Data & AI projects.

A Dracma is a managed hour of a Data & AI specialist, which will be allocated according to the client's demand, always managed by the Dedalus backoffice team.

As suggestions, we have the Small, Medium and Large packages and the client has the option of creating a customized package according to their needs.

Delivery Types

We present the types of scope that can be delivered with Atlas:

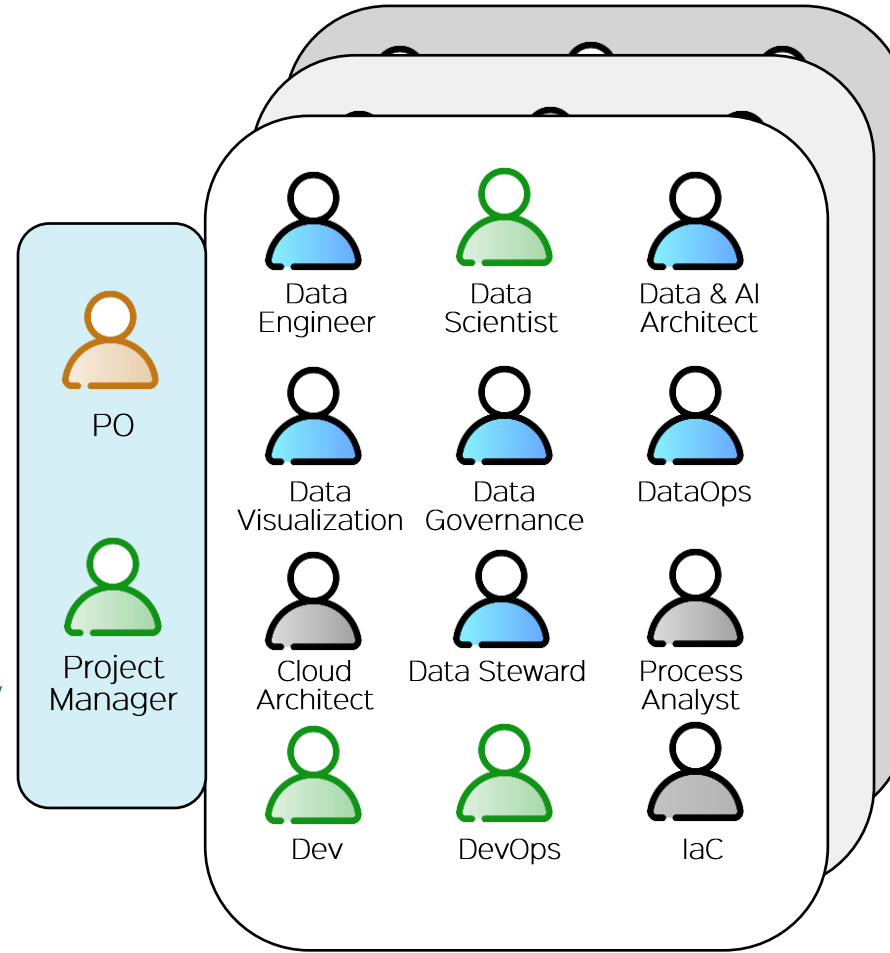

Assessment	Data Migration	Data Engineering			Data Driven		Data Science	
								
Diagnosis	Migration	Data Pipelines	Storage	Analytical Layer	Data Governance	Data Mesh	Machine Learning	Gen AI
Data Journey	Load testing/sizing	Data ingestion	Data Lakehouse Structuring	Data Modeling	Data quality	Methodology implementation	MLOps / FMOps / LLMOps	Agent/tool development
Data Architecture and Governance	Performance optimization	Processing and transformation	Architecture Optimization	Visualization / Dashboards	Metadata management	Data platform adaptation	Creating and maintaining models	Chatbots / Copilots
AI Journey	Migration	Orchestration		Business Intelligence	Data security and privacy		Custom applications	Graph RAG
					Business rules			Fine-tuning

What is Dracma?

It's a managed hour of a Data & AI expert

PO is responsible for understanding the need and allocation of professionals and GP is responsible for managing the project.

Our Experts

We present the profile of the professionals we recommend for each type of project:

Assessment

Diagnosis

- ✓ Data & AI Specialist
- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst

Data Migration

Migration

- ✓ Data & AI Specialist
- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst
- ✓ DevOps Analyst
- ✓ IaC Analyst

Data Engineering

Data Pipelines

- ✓ Data & AI Specialist
- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst
- ✓ DevOps Analyst
- ✓ IaC Analyst

Storage

- ✓ Data & AI Specialist
- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst
- ✓ DevOps Analyst
- ✓ IaC Analyst

Analytical Layer

- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst
- ✓ BI Analyst
- ✓ Data Steward

Data Driven

Data Governance

Data Mesh

- ✓ Data & AI Specialist
- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst
- ✓ BI Analyst
- ✓ Data Steward
- ✓ Developer

Data Science

Machine Learning

Gen AI

- ✓ Data & AI Specialist
- ✓ Data Engineer
- ✓ Data Scientist
- ✓ Governance Analyst
- ✓ BI Analyst
- ✓ Data Steward
- ✓ Developer
