

Pinpoint Relevant Institutional Knowledge in Seconds

with AI-powered search across all your document repositories and a knowledge assistant to handle more complex queries.

The screenshot displays the deepjudge search interface. At the top, there are three tabs: 'Client Portal', 'Sharepoint', and 'DMS'. The main search area features the 'deepjudge Search' logo and a search bar containing the query 'Cryptocurrency compliance with anti-money laundering laws'. Two search results are shown as overlays:

- Memorandum: Update on Penalties for Cryptocurrency Transactions Non-Compliance with Financial Regulations**
Client: CyberCoin Holdings
Matter: Regulatory Matters
Author: John Smith
Text: The Department of Justice (DOJ) has entered into a settlement agreement with Binance to address allegations that the company failed to implement necessary controls and procedures to prevent money laundering. These controls include "Know Your Customer" (KYC) requirements and monitoring processes. Additionally, Binance
- Form 10K Annual Report - Sprint Digital V20230101**
Client: Sprint Digital
Matter: Ongoing Compliance
Author: Jane Doe
Text: ...Financial Crimes Enforcement Network ("FinCEN"), a unit of the Treasury Department focused on money laundering, proposed a new set of rules for cryptocurrency-based exchanges aimed at reducing the use of cryptocurrencies for money laundering. These proposed rules would require filing reports with FinCEN regarding cryptocurrency transactions in excess of \$10,000 and also impose record-keeping requirements for cryptocurrency transactions in excess of \$3,000 involving users who manage their own private key...

How It Works

Configure DeepJudge to index your firm's document repositories and retrieve accurate search results for the services your professionals use most.

DeepJudge provides these essential components, tailored to the needs of your firm

Our proprietary search technology utilizes intent-based, permission-aware ranking to deliver the most accurate search results for legal documents. Our Knowledge Search comprehensively ingests work product, briefs, memos, client communication, and other document types in all common file formats and makes them available in a single, unified interface.

Knowledge Search

At the center is our proprietary indexing system, which can ingest unstructured documents from your DMS, your Microsoft ecosystem, your client portals, and more. The index is infinitely scalable and updates in real time as documents are changed.

Knowledge Search Front End

Access the entirety of your document archives from one intuitive starting point, which can be placed at the top of your intranet home page.

Knowledge Search API

Provides programmatic access to your developers to integrate DeepJudge Search with your other tools.

Knowledge Assistant

Optionally, use our integrated generative AI to handle complex search and summarization tasks.

Search the way you think

Accurate Content-focused Results at Lightning Speed

By discerning the intent behind your query, DeepJudge efficiently extracts insights from extensive document and knowledge management systems – even when the words used are different. Say goodbye to keyword searches. Our AI-powered search understands your language and finds the most relevant document-, paragraph-, or clause-level results from millions of documents in under one second.

The screenshot displays a search interface with a search bar at the top containing the query "punitive damages awarded for negligence in industrial accidents". Below the search bar, it indicates "59 results" and a "Relevance" sorting option. The results are presented in a list format, with two items visible:

- Document:** A sidebar on the left shows filters for document type (PDF, Word Document, Email, Other, Text) and a "Show more" option. Below this is an "Author" filter and a "Created" date range selector (2000 to 2024) with a "Today" button. At the bottom of the sidebar is a "Parties" filter.
- Result 1:** "Ray v. InnovaSphere Technologies, LLC-E.D. Tex.-9:20-cv..." from "InnovaSphere > Published Documents". The document type is "Complaint / Petition". The snippet highlights: "InnovaSphere Technologies had actual subjective awareness of the risks involved, but nevertheless proceeded with conscious indifference to the rights, safety, or welfare of others. **Consequently, Defendant is liable to RAY for exemplary damages. VII. Damages, A. General Damages of DOROTHY RAY 21. At the time of the accident made the basis of this suit, Plaintiff, DOROTHY RAY, was 86 years of age. 22. As a direct and proximate result of Defendant's negligence, Plaintiff, DOROTHY RAY, has...**" The author is "Andrew Rivera" and the judge is "Thad Heartfield".
- Result 2:** "RE: Case Review" from "NextCore > Emails". The snippet highlights: "In our recent review of similar cases, we found a notable instance where **the court imposed substantial punitive damages due to severe misconduct in a workplace incident.** Specifically, in Smith, the court considered the issue of employer liability where a maintenance worker..." The sender is "Jessica H. Levine" and the recipient is "Charlie Henriksson".
