## INTEGRATED PLANNING FOR EVERYONE

Forward thinking organizations give everyone the planning and analysis capabilities they need to make the best decisions.

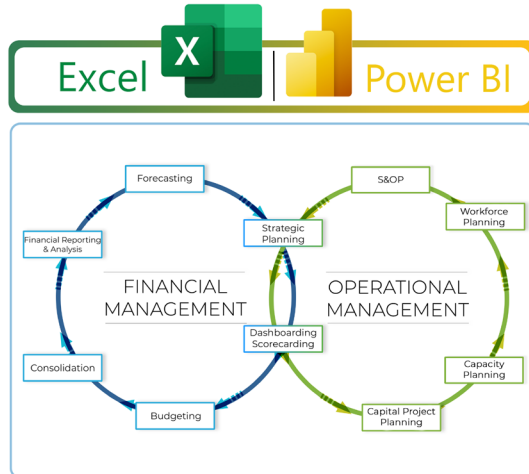

They don't need another technology product, just one Integrated Planning platform that adds comprehensive planning and analysis capabilities to the products they already use.

- ✓ Power BI and Excel offer core analysis capabilities. Adding the ability to write-back data from Power BI and Excel adds critical planning capabilities.
- ✓ A single, high-performance data engine processes and integrates all data across an organizations in real-time.
- ✓ Integration with all Microsoft platforms adds advanced data integration, collaboration and productivity capabilities.
