

Data Mesh with Azure

Azure Marketplace advisory services

Azure Marketplace offerings

1-Hour Executive Briefing

1-hour briefing to unravel the Data Mesh paradigm and its core tenets, explaining the key benefits it can bring to your organization and real-world insights on how we are approaching Data Mesh at our customers on Azure.

- **Online**

1-Day Deep Dive

1-day workshop to deep dive into Data Mesh through an accelerated learning journey, with a strong focus on Azure, detailing core concepts, design considerations, architectural best-practices and lessons learned from real-world implementations.

- **Online or on site**
- Interested? Contact delaware for more details

2-Week Assessment & Proof of Concept

10-day engagement deep diving into Data Mesh through an accelerated learning journey, in combination with an organisational assessment analyzing AS-IS, TO-BE and solution proposal, followed by a proof of concept with end-to-end demo using delaware's templated data mesh accelerator (in line with Microsoft's Cloud Scale Analytics recommendations).

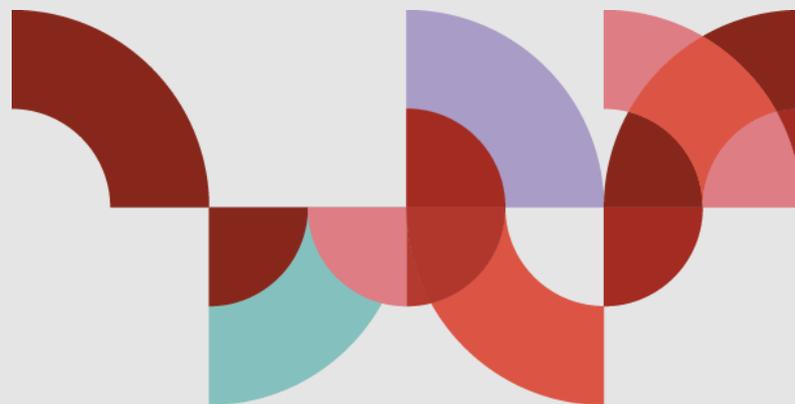

- **Online or on site**

Data Mesh with Azure

1-Hour Executive Briefing

1-Hour Executive Briefing

In short

1-hour briefing to **unravel the Data Mesh paradigm** and its core tenets, explaining the key **benefits** it can bring to your organization and **real-world insights** on how we are approaching Data Mesh at our customers on Azure.

Target audience

- IT Leaders (CIO, CDO, CTO)
- Digital Transformation Managers
- Enterprise Architects
- Data Platform Architects

Extended summary

The ability to harness the power of data is a key differentiator for businesses in the digital age. It helps them to plan more accurately, produce more efficiently, make better strategic decisions, and reduce waste.

Organizations at the top of the data maturity scale treat data as a true product, not just a resource, which drives value by participating in an ecosystem of data producers and consumers. In addition, these organizations manage their data in a decentralized and democratized manner, putting ownership to the people and teams who are closest to it, embracing the inherent distributed nature of data. Not coincidentally, these are two of the core principles underpinning Data Mesh.

This 1-hour interactive executive briefing is intended for IT leaders, Digital Transformation Managers, Enterprise Architects and Data Platform Architects looking for a solid explanation on what Data Mesh is and is not, the challenges it helps to address and the benefits it can bring, as well as insights from delaware's own project experience on how we are approaching it at our customers on Azure.
