Target audience

- IT Leaders (CIO, CDO, CTO)
- Digital Transformation Managers
- Process Owners

Extended summary

Generative AI is becoming a key differentiator for businesses eager to disrupt their way of working in this digital age. It helps them in their creative thinking, increase process efficiency, grow their responsiveness, design new business models,...and much more.

Organizations who understand this see Generative AI as a core capability, not a gimmick, that generates value by introducing enriched capabilities in their way of working. These organizations strengthen their operations with AI-generated skills. It allows organizations to think out-of-the-box and benefit from the power of artificial intelligence, embracing it as an extension to their existing capabilities.

This 1-hour interactive executive briefing is intended for IT leaders, Digital Transformation Managers, and Process Owners looking for a better understanding of Generative AI, the opportunities it brings and the challenges it helps to address, as well as real-world examples on how businesses are taking advantage of OpenAI today and how delaware is assisting them.
