

Power BI Monitoring

Leveraging the Microsoft Power BI Platform by providing an out-of-the box monitoring & governance tracking solution

 delaware

Power BI Monitoring

A truly governed platform with delaware's out-of-the-box Power BI Solution

WHAT

- Built on top of the Power BI REST API & Graph API stack using Azure Functions & Azure SQL DB to store the data gathered
- **Pre-packaged data models & reports** - gathering & combining data from power bi & azure ad to get a comprehensive overview
- **Keeping track of the accepted governance framework with a strong focus on actionable insights** including: License Management, Artifact Management, Red Flag management, Refresh Failures,...
- **Extend & Customize** - as all activities on the platform are gathered, organizations can pick & mix to their needs, enabling them to find insights based on their own governance rules & responsibilities

BENEFITS

- **Accelerating Data Culture**, making growth tangible/visible in a governed way
- **Keeping a clean, lean & governed platform**, avoiding overhead in time & resources
- **Mitigating security risks & be data compliant**
- **Cost-efficiency** of the power bi platform by enabling license management

TECH

- Power BI
- Azure AD
