

SMART

SOLUTION

Visual Planning for better efficiency

Improve your production efficiency and machine occupation, lower work in progress and avoid backorders by a more transparent production planning.

What is the planboard

The planboard provides an interactive visual layer on top of standard D365 processes enabling the production planner to get instant insight in the productions to be planned. Business specific scheduling intelligence can be added flexibly if needed.

Why customers use the graphical planboard

This planboard will

- increases planning insight
- avoids planning conflicts
- monitor on-time productions

Optimization by

- decreasing setup time
- Adding planning validation rules
- Performing simulations before applying

Increase planning efficiency

- Planning by drag& drop
- Collective planning of multiple operations
- Visual alerts

Real time

- Online shopfloor progress updates
- Maintenance planning integration
- Automatic rescheduling

Increase planning efficiency using the SMART graphical planboard

Instant results

- Actionable planning insight
- Reduced planning effort

Planboard & D365

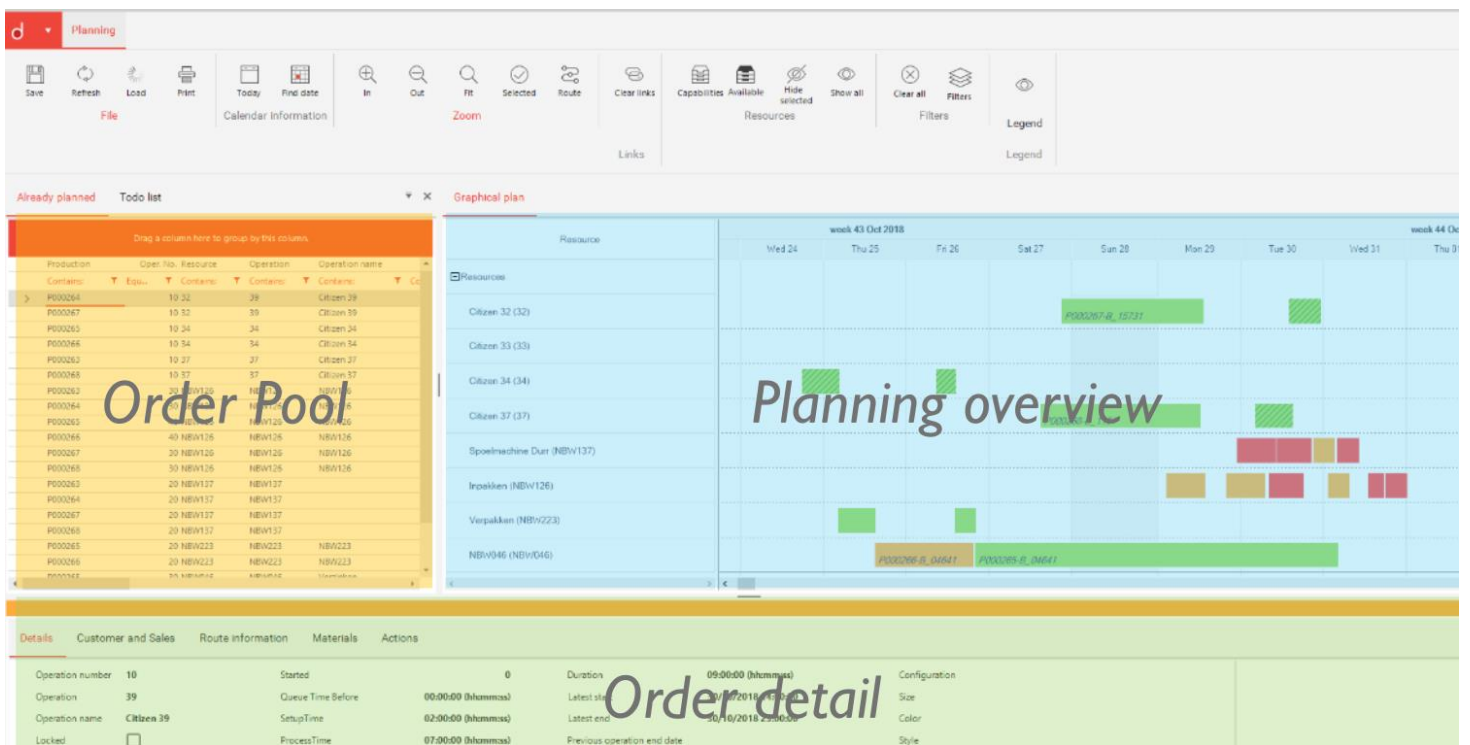

- Integrated solution on top of D365
- Performance optimal solution architecture

Our promise to you

A user-friendly and actionable planning overview to increase planning efficiency

An offer to get you started

- Value statement about your offer
- Context about your offer
- The offer
- Proof this offer is of value

Why delaware?

delaware understands very well the manufacturing specific needs thanks to the experience builded up in a variety of implementations. By using a pragmatic approach, projects and solutions are delivered to the customers.
