Accelerate your data insights with Power BI Jumpstart Services

Accelerate time to value with Microsoft Power BI services from Dell EMC

Jumpstart your adoption and usage of Microsoft Power BI solutions with innovative & rapid services from Dell EMC

Rapid time to value with Power BI services capabilities

By putting data-driven decisions at the heart of your business, your organization can harness a wealth of information, gain immediate insights, drive innovation, and create competitive advantage. Big data and powerful predictive analytics tools are now the key to competitive advantage.

But big data doesn't have to mean big project. And enterprise ready doesn't have to mean expanded costs. Dell recognizes that you need to demonstrate value with new solutions quickly, in order to build upon that success with scale.

Power BI engagements

Dell EMC Services provides a complete ecosystem of services solutions that enable your organization to implement the optimal Power BI strategy. These are provided in small rapid workloads that range from a few days to a few weeks. These Jumpstarts allow you to quickly demonstrate value with your Power BI related solution.

Our full range of Microsoft Business Intelligence services includes:

- Dashboard in a day training sessions
- Rapid Proof of Concept (PoC) execution
- Agile Power BI implementation jumpstarts
- Reference patterns for advanced deployments including data distribution, high availability and security of SQL and Power BI
- Custom integrations with Azure Machine Learning and unstructured data sources

Key Benefits

- Make decisions in real time across disparate systems

- Integrate with Azure ML for advanced and predictive analytics

- Demonstrations and Proofs of Concept (PoCs) to accelerate understanding

- Power BI Jumpstarts offer robust starting points to analytics adoption in your enterprise.

- Reference architectures both on premises and Azure based so you can provide data in the right format and in the right time to the right audience with scale.

# Data Modernization Assessment & Power BI PoC

Following an As Is/To Be whiteboard session to understand your future state goals, our experts will demonstrate the newest features and capabilities of the Microsoft BI stack from SQL Server, Azure SQL, SQL Server Reporting Services and Power BI to determine potential fit.

During this engagement, a half day Proof of Concept with Power BI is used to demonstrate modernized reporting. Deliverables include a roadmap to support your future growth with suggested approach, products and services.

This 3 day service, valued at US$6000 can be customized and may be funded for qualified customers.

Power BI Jumpstart Services

Our agile approach to delivering on the promise of modernized reporting and self-service analytics begins with design/assessment, then developing interactive analytics against your existing data sources.

We offer two popular options of the Power BI Jumpstart, which can be customized for your needs:

2 Week Jumpstart PoC: We design and craft 1 dashboard with up to 4 visualizations against up to 2 data sources. This non-production ready project will demonstrate key concepts of Power BI so you are poised to take it to the next level.

8 Week Jumpstart Pilot: We will develop up to 5 dashboards against existing data sources and frame a production deployment strategy that includes environment design, training and security integration.

Ready for the next step?

Dell EMC's lifecycle services have been recognized by Microsoft year over year. Dell is a Microsoft Gold Data Analytics, Gold Data Platform, Gold Cloud Platform and Gold Intelligent Systems Competency partner. Rely on this expertise across your full spectrum of SQL, Business Intelligence and Big Data needs. Special incentives may be available for qualified customers.
