

Business continuity for the digital business with Dendrio and Microsoft Azure Backup

We can help you integrate

Your applications up and running in no time after a disaster, with virtually no loss of data. We guarantee application recovery, which means that we not only make sure that your servers are booted in Azure.

Microsoft Azure Backup

Centralized management

Monitor, operate, govern, and optimize data protection at scale in unified and consistent manner using Backup Center

Application consistency

Back up and restore data from virtual machines with application consistency in Windows using Volume Shadow Copy Service (VSS) and in Linux with pre- and post-processing scripts.

Multi-workload support

Back up Azure Virtual Machines, on-premises servers, SQL Server and SAP HANA on Azure Virtual Machines, Azure Files, and Azure Database for PostgreSQL

Durable storage options

Store your backups in locally redundant storage (LRS), geo-redundant storage (GRS), and zone-redundant storage (ZRS).

Our expertise + Microsoft Azure Backup

We're the expert in cloud deployment...

- Solutions implemented successfully to the important customers
- Monitoring and optimization services post implementation
- Adoption services

We can help you integrate your...

Your applications up and running in no time after a disaster, with virtually no loss of data. We guarantee application recovery, which means that we not only make sure that your servers are booted in Azure.

You don't have to worry about the availability of your application

We go far beyond many other cloud migration and disaster recovery offerings, which stop at just booting your servers.

Dendrio is the smart guide that leverages existing technologies and identifies new technologies to provide a competitive advantage to its customers: price, reaction speed, safety and optimization. In this way, it facilitates business Journey.

Every business day is a journey in the world of technology. Dendrio is with you.
