

## Ink.it - Paperless & presence-less document execution

Ink.it is SignDesk's evidence creation suite, designed for instant & remote document signing. We use legally valid evidence creation to help businesses remove paper-based inefficiencies & sign documents effortlessly.

### Here's how they work.

### We offer

- **Electronic signatures (E-Sign):** Signatures are made using a one-time password (OTP) sent to the signer's email or phone
- **Video-based evidence creation (VBEC):** An all-new video-enabled solution for contract consent via video

### E-Sign Features:

- Custom templates & customizable dashboard
- Multiparty & multi-location signing
- User roles, permissions & document management
- Sequential & parallel signing order
- Instant signer verification
- Transaction monitoring & audit logs

### VBEC Features:

- OCR-based image data extraction
- Facial matching capabilities
- Audio-visual consent on agreements
- Increased layers of security
- Video evidence of authentication
- Password-protected approval verification
