

# Copilot declarative agent implementation

Create customized Copilot agents that leverage your specific data and processes

# Challenges We Aim to Solve

## 1. Inefficient Workflows:

- Teams spend excessive time on repetitive tasks due to a lack of automation.
- Existing systems are not fully integrated, creating bottlenecks.

## 3. Time-to-Adoption Challenges:

- Traditional AI solutions demand lengthy configuration and training.
- Downtime during setup impacts productivity.

## 2. Lack of Customization:

- Generic AI solutions fail to address specific organizational needs.
- Advanced coding or technical resources are often required.

## 4. Data Security Concerns:

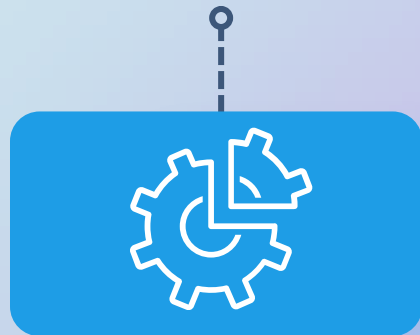

Businesses need assurance of secure AI integration with existing data systems.

# Our Solution

## Empowering Your Business with AI-Driven Copilot Agents

### Seamless Integration

Connects with Microsoft 365, external databases, and third-party systems to create a unified interface for your organization.

### Scalable and Flexible

Adapts to your growing business needs, ensuring continuous alignment with your objectives and evolving demands.

### Automated Efficiency

Streamlines repetitive tasks, saving time and reducing operational errors, enabling teams to focus on strategic priorities.

### Custom AI Agents

Tailored to your business processes, designed to manage FAQs, workflows, and complex queries.

### Intelligent Insights

Advanced analytics track performance, providing actionable data to optimize operations and improve decision-making.

# LinkedIn Expert

Implement a LinkedIn expert agent with the goal of helping Marketing and HR departments quickly craft new posts following all the best practices and guidelines for LinkedIn content creation.

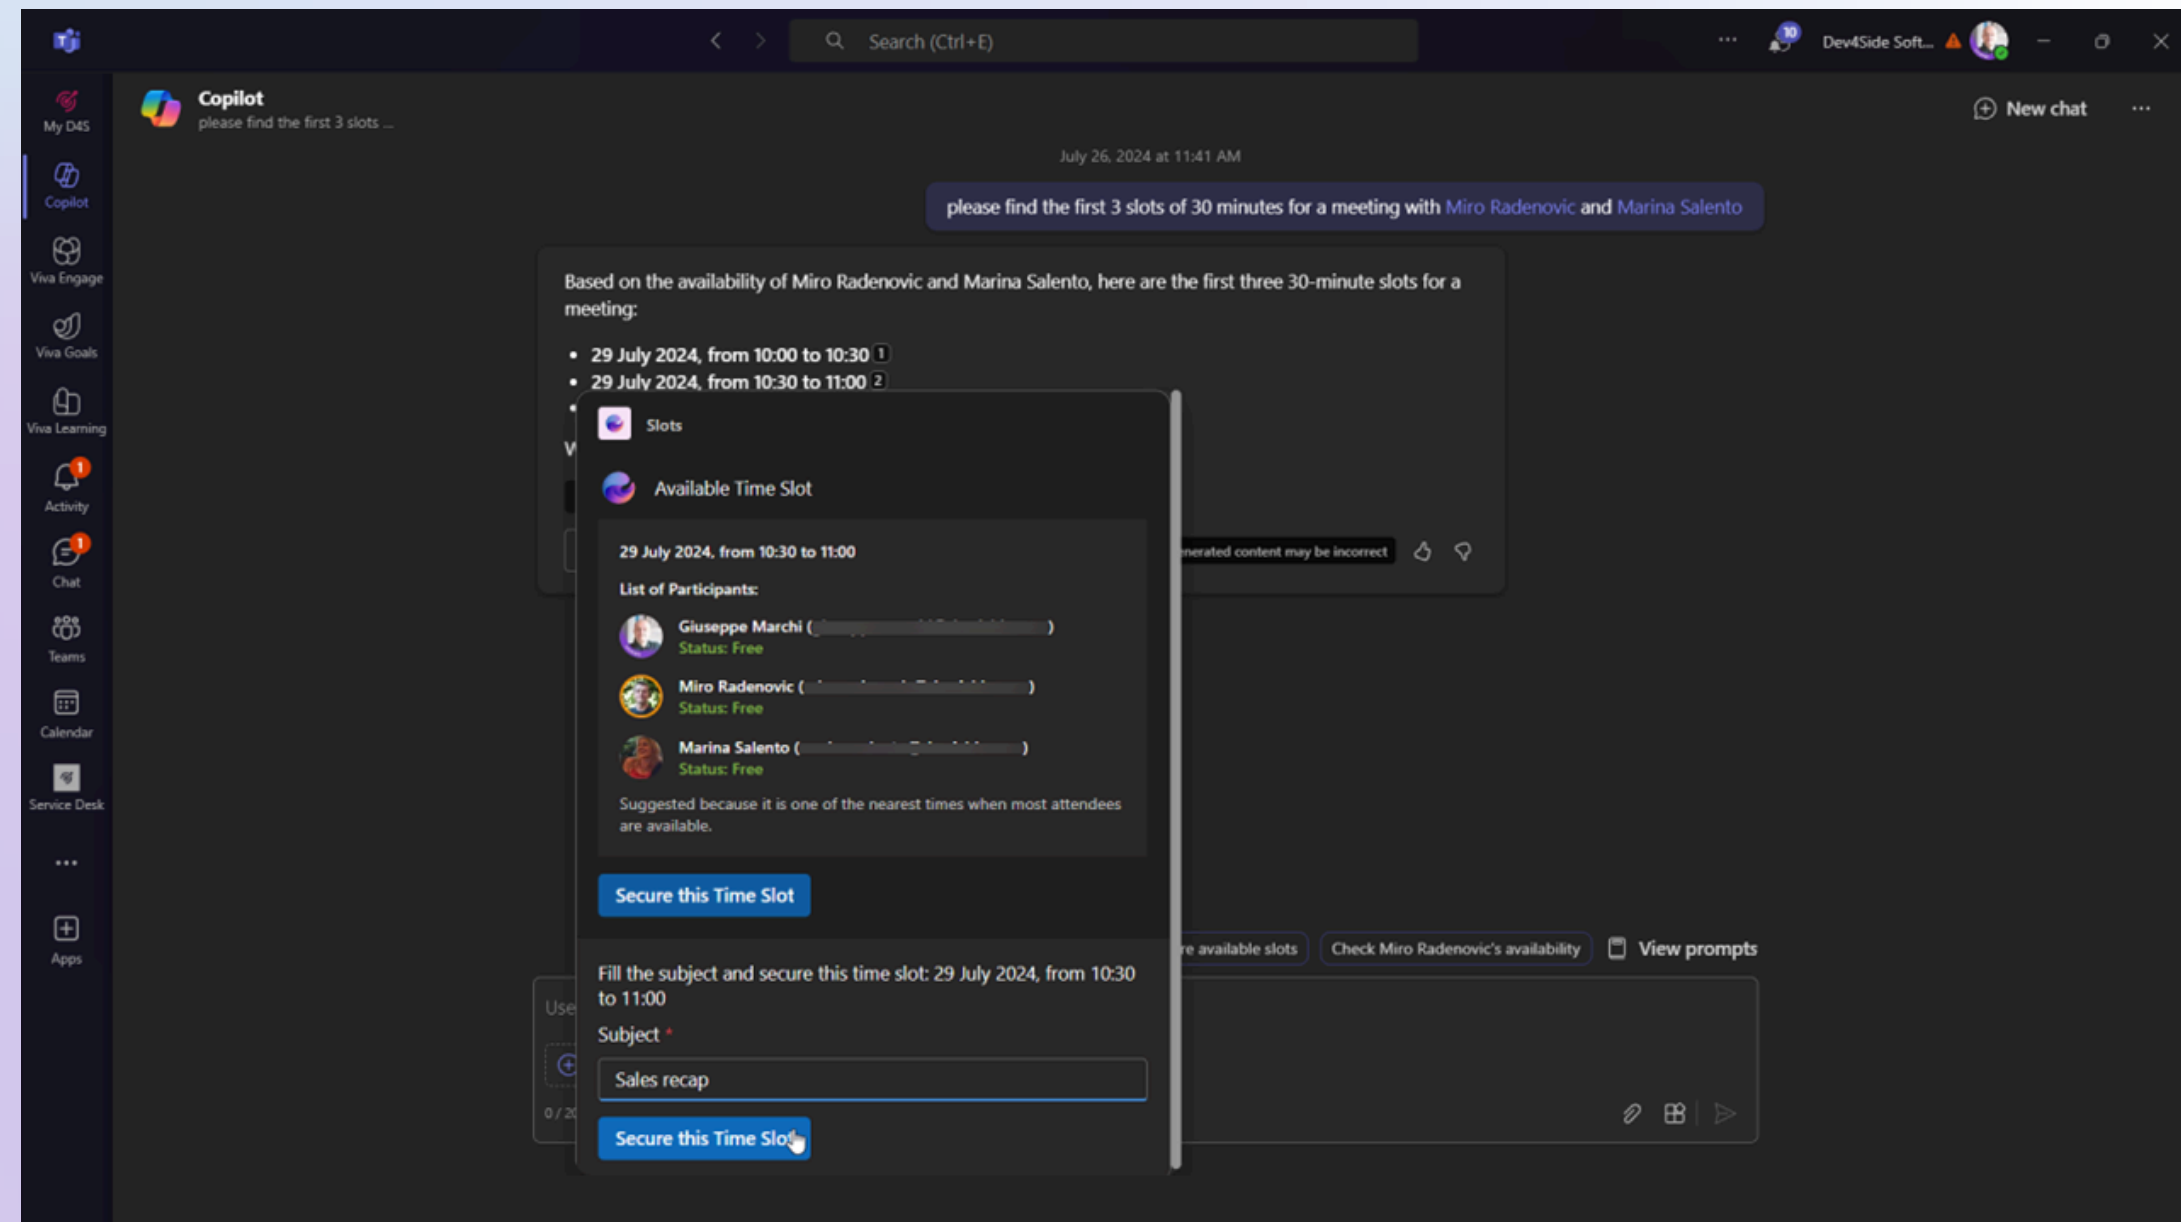

## Sample agents 2/4

# Slots finder

Simply use natural language to search for slots with your colleagues and book meetings directly from the chat in seconds. Plus, extend Copilot's capabilities to check not just your calendar, but all calendars within your organization. Streamline your scheduling and make your meetings a breeze!

In a few weeks, this plugin will be converted to a custom agent and added inside AppSource.

The screenshot displays the Microsoft Copilot interface within a Teams chat window. The chat history shows a user's request: "please find the first 3 slots of 30 minutes for a meeting with Miro Radenovic and Marina Salento". Copilot's response provides the following information:

- Based on the availability of Miro Radenovic and Marina Salento, here are the first three 30-minute slots for a meeting:
- 29 July 2024, from 10:00 to 10:30
- 29 July 2024, from 10:30 to 11:00

A detailed view of the selected slot (29 July 2024, from 10:30 to 11:00) is shown, including a "List of Participants":

- Giuseppe Marchi (Status: Free)
- Miro Radenovic (Status: Free)
- Marina Salento (Status: Free)

The interface also includes a "Secure this Time Slot" button and a prompt to "Fill the subject and secure this time slot: 29 July 2024, from 10:30 to 11:00". The subject field is populated with "Sales recap".

# Room finder

Simply use natural language to search for available rooms in your facilities and book them directly from the Copilot BizChat.

The plugin is able to directly book Exchange Online rooms.

The screenshot displays the Copilot chat interface. At the top, a search bar contains the text "trova le Rooms disponibili il 16 luglio a Milano dalle 11:00 per 15 persone". The chat history shows a message from Copilot: "Ho trovato una sala disponibile a Milano per il 16 luglio alle 11:00 che può ospitare fino a 15 persone. La sala si chiama **Acquario** e ha una capacità di 14 persone. È situata a Milano e puoi contattarla tramite l'indirizzo email [acquario@dev4side.com](mailto:acquario@dev4side.com) o al numero di telefono +39 02 39 29 5655. Tuttavia, è già occupata dalle 09:00 alle 10:00, quindi potrebbe essere disponibile subito dopo per il tuo evento. 1". Below this, an alternative room "Newton" is mentioned. A "Copy" button is visible. A modal window titled "Rooms" is open, showing a photo of the "Acquario" room and its details: Capacity: 14, City: Milano, Email Address: [acquario@dev4side.com](mailto:acquario@dev4side.com), Phone: +39 02 39 29 5655. The modal includes "Reserve this Room" and "Show Schedule" buttons. The chat input field at the bottom contains the prompt "Quali sono le altre opzioni di sale dis..." and a suggestion to "Add people, files, and more for better results".

# Internal KB agent

Agents are educated to reply to questions related to internal needs. The replies are generated starting from the contents of an internal KB created inside SharePoint Online.
